

Journal of Interdisciplinary Mathematics

VOLUME 29

NUMBER 1

JANUARY 2026

CONTENTS

- A. THIANDOUM, A. NDIAYE AND R. NKUNZIMANA : On generalization of biharmonic curves in a Walker 3-manifold 1-9
- S. AYADI AND A. BENALI : Ulam-Hyers stability of Volterra integral equation in a b_p (s)-metric space 11-17
- N. A. TAGHI-NEZHAD AND F. TALESHEAN : Solving the fuzzy 1-center problem with an innovative ranking method for fuzzy numbers 19-35
- R. ACHOUR : On the mixed multifractal dimensions of product measures and sets 37-56
- C. J. NWEKE, A. U. UDOM, G. C. MBAEYI AND U. MICHAEL : Convergence results for solution of some families of multiple set split feasibility problems in stochastic domain 57-70
- C. CARPINTERO, N. RAJESH, E. ROSAS AND J. SANABRIA : Weakly (K, L) -continuous functions in ideal bitopological spaces 71-84
- M. R. NADIR AND A. JAWAHDOU : Second kind Chebyshev polynomials for solving logarithmic Volterra-Fredholm integral equations 85-94
- H. I. LAFTA, Z. A. JAAFAR, R. G. IBRAHEEM AND S. KHALIL : Rheological study of hot Bingham fluid inside an oval canal with Laminar peristaltic flow 95-104
- K. M. JARAD AND A. A. ABDULSAHIB : Numerical solution of random ordinary differential equations by using modified decomposition method 105-112
- H. K. MOUSA : On fuzzy K -skew $(\mu - \tilde{J})$ quasi binormal operator 113-117
- J. M. JAMIL, G. M. AL-HASHIMI AND I. E. UBAID : On new type of Δ -open sets 119-127
- E. A. DAWOOD AND Y. Y. YOUSIF : Fibrewise micro-connected topological spaces 129-135
- H. K. ASKER, H. K. ISMAIL, M. T. KAHNGER AND L. HENDI : Convergence regarding EM schemes over neutral type SFDEs at space C_u with undetermined delay 137-144
- J. A. A. AL-HAWASY, W. A. IBRAHIM, L. H. ALI AND M. A. JAWAD : Optimal mixed control problem dominating by triple system of parabolic equations 145-161
- R. F. HASAN, A. M. SALIH AND A. H. ZABOON : Best multiplier co-approximation of unbounded functions in space $L_{p, \lambda_n}(X)$ 163-168
- V. J. SHAALINI AND S. E. FADUGBA : Analysis of new RET single-step method for solving stiff and singular types of ordinary differential equations 169-180
- N. O. ERTAŞ AND S. YILMAZ : Indecomposable decomposition of the A_n quiver 181-191
- N. PREETHI AND G. K. REVATHI : A study on Pythagorean fuzzy digital feeble centred structure compactification 193-207
- S. P. CHAUHAN, P. K. PANDEY AND S. K. CHAUBEY : Construction of tubular surface by infinitesimal bending of a curve 209-224
