Contents

1. Hybrid Energy Storage Devices based TET system design for Powering the ICP Devices 1-10
R. Narayanamoorthi, A. Vimala Juliet, A. Dominic Savio and Pradeep Vishnuram
2. Induction Motor Drives-A Literature Review 11-21
Ranvir Kaur and G.S. Brar
3. Smart Vital Sign Monitoring System Based on LabVIEW Using Zigbee 23-34
Amritjot Kaur and Shimi S.L.
4. A Novel method for the development of Solar Energy through Nature by 35-40
Nano-piezoelectrical Materials
Amritjot Kaur, Apoorva Kanthwal, Sandeep Kaur and Minakshi Khushoo
5. Cock-croft Walton voltage multiplier as a voltage source to three electrode setup of 41-47
volume resistivity measurement
Sanaha Sapehia and Jaspreet Singh Chahal
6. Review on the Optimization of Power System Stability and Analysis Using Facts 49-54
Controller
Sandeep Kaur and Raja Singh Khela
7. Efficient Wireless Power Transfer System for Generation of Magnetic Propulsion 55-64
Torque for Microrobot
R. Narayanamoorthi, A. Vimala Juliet and A. Dominic Savio
8. Ant Colony Optimization based Maximum Power Point Tracking (MPPT) for 65-73
Partially Shaded Standalone PV System
R. Sridhar, Pradeep Vishnuram D. Hima Bindu A. Divya
9. Inductance Based Sensorless Control of Switched Reluctance Motor 75-82
Pradeep Vishnuram, Siva T., Sridhar R. and Narayanamoorthi R.
10. Design of Thirteen Level Cascaded H-Bridge Inverter for Low Power Applications 83-92
S. Vaishali, R. Sai Janani, Jodhi Mohana Monica and V. Swetha
