INTERNATIONAL JOURNAL OF COMPUTER SCIENCES, SOFTWARE ENGINEERING AND ELECTRICAL COMMUNICATION ENGINEERING

Volume 11 • Number 1 • Jan-June 2020

CONTENTS

An Augmented Hopfield Neural Network for Optimal Thermal Unit Commitment • <i>A.Y. Abdelaziz, M.Z. Kamh, S.F. Mekhamer and M.A.L. Badr</i>	1-12
Particle Swarm Optimization Based Control Actions for Identified Generators of a Power System Under Contingencies • <i>Manoj Kumar Maharana and K. Shanti Swarup</i>	13-23
Power Flow Formulation as a Nonlinear Programming Problem • <i>Victor J. Gutierrez-Martinez, Claudio R. Fuerte-Esquivel</i>	25-28
A Novel Penalty Coefficient-less Fuzzy Adaptive Differential Evolution Algorithm for Optimal Reactive Power Dispatch • <i>P. Kanta Rao and K. Vaisakh</i>	29-37
Price Based Unit Commitment with Arbitrage and Emission Constraints Using Genetic Algorithm • <i>Anurag K. Srivastava, Seetharama R. Rudraraju, Paras Mandal, Jignesh Solanki and Sarika Khushalani</i>	39-45
Identification of Mode Observability and Controllability to Optimize Controller Design by Prony Analysis in Power Systems • <i>Ye Yuan, Guo-Jie Li, Yuan-Zhang Sun and T.T. Lie</i>	47-55
An Optimal Design Approach for Off Grid Power Supply System for Remote Power Solution • <i>Subhadeep Bhattacharjee and Madhuchanda Choudhuri</i>	57-62
Designing Offshore Super Grid for the Combined Operation of Offshore Wind Farms and Hydro Storage • <i>A. Grimaldi, Z. Chen, P. Chen, P. Siano and A. Piccolo</i>	63-72
Optimal Controller for Shunt Active Filter Under Unbalanced and Distorted 3P4W Distribution Systems • <i>R.D. Patidar and S.P. Singh</i>	73-83
Evolving Ant Direction PSO-DV Algorithm for OPF with Non-Smooth Cost Functions and Statistical Analysis • <i>L.R. Srinivas and K. Vaisakh</i>	85-95
Optimal Controlled Power Flow Solution Methods for Large Power Systems Embedded with Multiple UPFCs • <i>Tsao-Tsung Ma</i>	97-104
Optimization of SVC-FACTS Controller Parameters Using GA in Power System Transient Stability Improvement • <i>N. Karpagam and D. Devaraj</i>	105-111
