Indian Journal of Chemistry

Sect. B: Organic Chemistry including Medicinal Chemistry

VOL. 58B

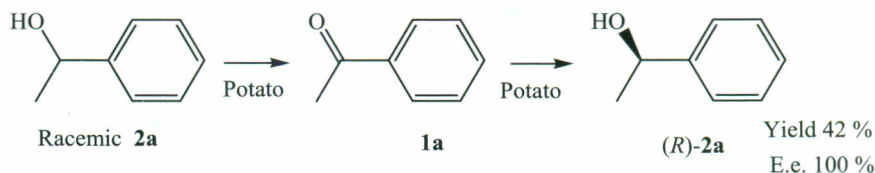

NUMBER 01

January 2019

CONTENTS

Papers

- 69 **Production of chiral aromatic alcohol by The racemic alcohols were converted into the corresponding (*R*)-acetophenone and 1-arylethanol derivatives using alcohols in high *ee* with Japanese potato (*S. tuberosum*) catalyst. vegetables**

Takamitsu Utsukihara* & C Akira Horiuchi

Department of Material and Environmental Engineering, Hakodate National College of Technology
 14-1, Tokura-cho, Hakodate, Hokkaido 042-8501, Japan

- 75 **Synthesis and spectroscopic investigation of fluorescent compounds containing bis-pyrazole ring**

Tiegang Ren*, Guihui Li, Baowan Fan, Tengfei Wang & Jingshun Zhang

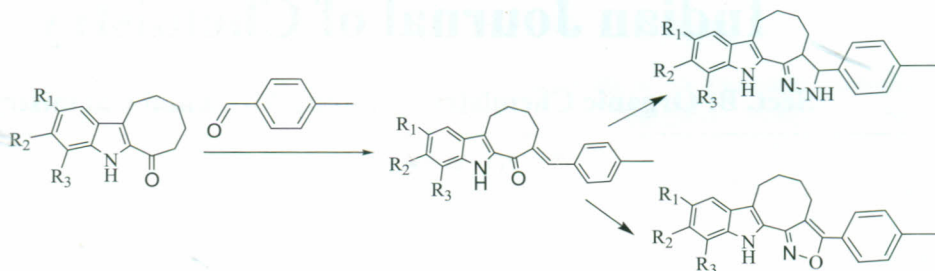

Fine Chemistry and Engineering Research Institute, College of Chemistry and Chemical Engineering, Henan University,
 Kaifeng 475004, People's Republic of China

- 88 **Antibacterial evaluation and QSAR studies of 1,2,3-triazole bridged with amide functionalities**

C P Kaushik*, Raj Luxmi, Ashwani Kumar, Krishan Kumar & Ashima Pahwa

Department of Chemistry, Guru Jambheshwar University of Science & Technology, Hisar 125 001, India

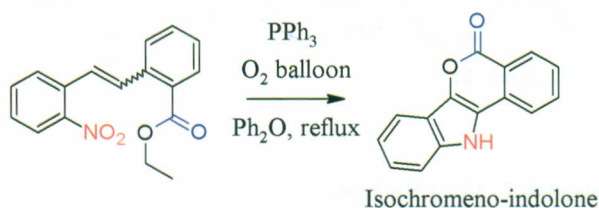

- 96 **Synthesis, characterisation and biological study of pyrazolino and isoxazolo cycloocta[*b*]indole derivatives** By an efficient route, the heteroannulated indole derivatives are synthesized, characterized and their biological activity is studied, using the eight membered alicyclic ring as core.

B Tamarasan & V Sangeetha*

Department of Chemistry, Kongunadu Arts and Science College, Coimbatore 641 029, India

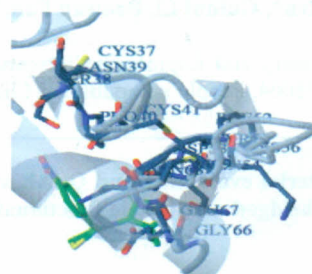

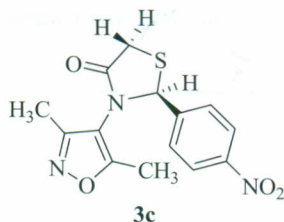

- 104 **Unique synthesis of isochromenoindolone via reductive-oxidative cyclisation approach**

Hari K Kadam* & Santosh G Tilve

Department of Chemistry, St. Xavier's College, Mapusa, Goa 403 507, India

- 109 **Synthesis and pharmacological evaluation of 3-(3,5-dimethylisoxazol-4-yl)-2-arylthiazolidin-4-ones as potential antioxidant, anti-inflammatory and agents** 3-(3,5-Dimethylisoxazol-4-yl)-2-arylthiazolidin-4-ones **3a-l** have been synthesized from 4-amino-3,5-dimethylisoxazole **1** by condensation with aromatic aldehydes, followed by cyclization with mercaptoacetic acid in excellent yields, and have been evaluated for *in vitro* antioxidant, *in vivo* anti-inflammatory and analgesic activity

Srinivas Marri, Ramu Kakkerla*, M P S Murali Krishna, Harikiran Lingabathula, Narsimha Reddy Yellu & Ramchander Merugu

Department of Chemistry, Satavahana University, Karimnagar 505 001, India
