INDIA-USA BILATERAL ECONOMIC AND TRADE COOPERATION ON CONTINUED UPWARD TRAJECTORY

Dr. S P Sharma & Ms. Bhawna Kakkar

India and USA, the world's two largest democracies have seen a tremendous upswing in bilateral relations over the last few years. Both the countries share strong, robust and growing bilateral relations across the entire spectrum of trade and commerce based on increasing economic cooperation and shared democratic values. The two nations have displayed a common intent in promoting global economic prosperity through open and fair trade, investments, and connectivity. Viewing one another as important strategic partners to promote peace and stability regionally as well as globally, India and USA have been closely working together to provide a positive and forward-looking vision to the expanding bilateral partnership.

Over the years, cultural exchanges and people-to-people relations between India and USA have played an important role in

strengthening bilateral ties. The Indian diaspora in the US has rapidly developed from a small group to a well-established part of the American society of the 21st century. Being a vital resource contributing to the economic, political and social development of both India and USA, the Indian-American diaspora has

helped in fostering successful bilateral relations.

On the back of long-standing historic bilateral relations, India and USA have seen multiple mutual visits at the leadership-level to enhance India-US engagement and identify potential areas of promotion of trade and investment

relations. Furthermore, India and USA have more than 50 bilateral inter-governmental dialogue mechanisms in place for exchange of views on wide ranging areas.

After assuming office in 2014, Prime Minister of India, Shri Narendra Modi has visited USA on a number of occasions involving participation in high-level multilateral summits and also conclusion of bilateral engagements. The outcomes of these visits have been instrumental in further strengthening the multifaceted ties between the two countries. In September 2019, the Indian Prime Minister visited USA for a series of high-level events and interactive sessions with the Indian-American community and the CEOs of leading energy companies in USA. He addressed over fifty thousand people at event in Houston, Texas and was joined by US President Donald Trump.

INDIA-USA BILATERAL ECONOMIC AND TRADE ...

Continued from page 1

Subsequently, early 2020 saw the landmark maiden visit of Mr. Donald Trump to India thereby adding another dimension in the bilateral relations between the two economies. Through various interactions, India and USA decided to elevate bilateral relations to the level of a Comprehensive Global Strategic Partnership. A series of measures were also announced to increase bilateral economic cooperation including major defence deals, agreements in healthcare and energy sectors and onset of negotiations for a mega trade deal. The upcoming 5G technology was also discussed at length and the need for the emerging technology to be a tool for freedom, progress and prosperity.

Recently, United States of America has elected Mr. Joe Biden as its 46th President who had earlier served as the Vice President of the US in the Obama Administration from 2009 to 2017. During this period, India and US bilateral ties saw an uptick in confidence-building. At various occasions, Mr. Biden expressed his positive views on India-US bilateral relations and advocated a stronger Indo-US trade and economic partnership. With his election as the new President of USA, India is expected to witness a reinvigorated bilateral economic agenda facilitating economic growth, job creation, promotion of small businesses and rising trade and investment exchanges.

Bilateral Trade and Investment Relations

India's trade and economic cooperation with USA has registered phenomenal growth in recent years. Rapidly expanding trade and commercial linkages between India and USA form an important component of the multi-faceted partnership between the two countries. The volume of merchandise trade between India and USA has significantly increased from around USD 62 billion in FY2014 to around USD 89 billion in FY2020. India's merchandise exports to USA have increased from around USD 39 billion in FY2014 to around USD 53 billion in FY2020 while merchandise imports from USA have increased from around USD 23 billion to around USD 36 billion during the same period.

Moreover, India-USA bilateral trade in goods has registered double-digit growth in recent years and bilateral trade relations have noted tremendous progress. The US has remained India's top trading partner for the second consecutive year in FY2020 reflecting expanding economic ties between the two countries.

In India's total merchandize exports to

the world, USA's share stands highest at around 17%. India's top 10 export items to USA include pearls & semiprecious stones, pharmaceutical products, vehicles, electrical machinery, machinery and mechanical appliances, textiles & articles, mineral fuels, mineral oils, among others.

While in terms of imports, USA ranks 2nd highest amongst India's top 10 sources of imports with a share of 8%. India's top 10 import items from USA include mineral fuels, mineral oils, pearls & semiprecious stones, machinery and mechanical appliances, electrical machinery, organic chemicals, aircraft, spacecraft, optical & measuring instruments, plastic and articles, among others.

The volume of services trade between India and USA has increased from around USD 34 billion in 2013 to around USD 54 billion in 2019. India's exports of services to USA have increased from around USD 20 billion in 2013 to around USD 30 billion in 2019 while India's imports of services from USA have increased from around USD 13 billion in 2013 to around USD 24 billion in 2019. Thus, combining trade and services together, the bilateral trade between India and USA has increased from around USD 96 billion to around USD 143 billion during the same period. Based on strong complementarities and growth prospects, both the countries have significant potential to enhance bilateral trade in goods and services to the level of USD 300 billion by 2025 from the current level of less than USD 150 billion.

In terms of investments, USA is the 5th largest foreign investor in India with cumulative Foreign Direct Investments (FDI) equity inflows of close to USD 30 billion from April 2000 to June 2020. FDI equity inflows in India from USA stand at around USD 4 billion during FY2020. There are several major US companies operating in India and vice versa that is ushering in a new era of India-US bilateral partnership.

Being one of the most dynamic emerging market economies, India has been continuously considered as one of the top attractive destinations for inbound investments. Now, India has shown remarkable resilience in the pandemic COVID-19, by fighting the virus as well as ensuring economic stability. Therefore, India's continued improvement in the Ease of Doing Business rankings and pro-active reforms agenda offers an excellent platform for global investors to engage in a wide variety of sectors. Moreover, the Government's approach of providing long-term and sustainable solutions and building trust aligns well with the

investor's requirement and will significantly boost the sentiments of businesses to further enhance the trade and investment trajectory between the two economies.

India-USA bilateral economic outlook amid pandemic COVID-19

The global economy is experiencing the deepest recession since the Great Depression in the 1930s due to the continued spread of pandemic COVID-19. The containment measures and associated global supply chain disruptions have greatly impacted economic activities and created an unusual degree of uncertainty in almost every country. Although major macroeconomic indicators are witnessing an uptick across many economies on account of easing of Covid-related lockdown restrictions, there remain downside risks to speedy recovery of global economic health. In 2020, global growth is projected at (-) 4.4% while world trade is expected to fall by 9.2%.

In view of the above, dynamic economies such as India and USA hold immense potential for refueling global growth to a higher trajectory in the coming times. Both the nations have pledged to overcome this global crisis together and deploy the full strength of the India - USA partnership to resolutely and effectively combat COVID-19.

Recently, both the sides have expressed a desire to conclude an initial limited trade package and discussed the possibility of a Free Trade Agreement (FTA). The intent to negotiate for a preferential trade agreement in around 50-100 categories of goods and services is highly encouraging. With the newly elected administration in USA, a new era of revitalized economic cooperation that is comprehensive, complementary and collaborative is expected to significantly leapfrog from the present quantum of bilateral trade to a much higher trajectory.

At this juncture, there is a need to outline the contours for a sustainable full-fledged FTA between the two countries which is broad based and encompasses wide ranging potential sectors of development. There exist immense synergies in expanding trade and investments horizons in areas such as defence, space, energy, aviation, insurance, infrastructure, engineering, agriculture & food processing, manufacturing, entrepreneurship, healthcare & pharmaceuticals, water & environment, financial services, ICT & digital infrastructure including frontier technologies of 5G, big data analytics, quantum computing, blockchain and Internet of things, among others.

Potential gains in trade from India-USA FTA

The India-USA FTA could play a

cornerstone role in the long-standing bilateral trade and investments relations. Considering the vibrant trade and economic complementarities, such an agreement could boost trade and economic welfare in both the economies by removing trade barriers, increasing market access and providing a stable framework for comprehensive growth of the various sectors of mutual interest.

India's skilled & semi-skilled human capital resources highly align with the technological capabilities of USA whereas USA's companies offer infrastructural facilities to India, especially in logistics and construction sectors. The unique amalgamation of India-USA core competencies will surely lead to a sustainable and strengthened bilateral partnership. Thus, the India-USA FTA if concluded can act as an effective mechanism for unlocking additional trade liberalization in goods & services both bilaterally and multilaterally and do away with trade related distortions such as high tariffs and complex non-tariff measures.

Conclusions

Over the years, India-USA bilateral relations have witnessed a steep upward trajectory guided by shared democratic values and increasing convergence of interests on bilateral, regional and global issues. The bilateral trade and economic cooperation is a multi-faceted partnership that has transcended from the traditional arenas of military and economics to a knowledge partnership in high technology areas, space and cyber, healthcare, among others. In the interconnected world economy, the partnership between the two nations goes beyond trade and can be considered as resilient trusted partners in the global value chain especially amidst COVID-19 global economic scenario.

It is hoped that the new regime in USA would help to strengthen the bilateral economic agenda between India and USA thereby facilitating economic growth, job creation, promotion of small businesses and rising trade and investment exchanges. The talks of concluding a broad-based India-USA FTA would also get a significant boost encompassing a wide variety of sectors and removing market access barriers to unleash a higher trade trajectory. Since India and USA are natural partners, the trend of widening economic and trade relations between New Delhi and Washington will continue in the coming years on the back of strong complementarities and mutual synergies.
