CONTENTS

1. An Efficient Technique for Detecting Distributed Denial of Service Attack 113-131
M. Dileep Kumar and Smriti Agrawal
2. Overload Alleviation using Facts Devices in Restructured Power System 133-144
P. Deepika and PL. Somasundaram
3. Privacy for Sensitive Data-Data Warehouse 145-154
R.J. Poovaraghan and Padmavasani Kumarvel
4. Design of High Efficient and High Recognition Rate for Real Time..... 155-167
Handwritten Recognition using HMM and ANN Classification
Vinita Patil and Rajendra Patil
5. Air Compressor Fault Diagnosis through Vibration Signals using 169-178
Statistical Features and Logit Boost Algorithm
S. Aravinth and V. Sugumaran
6. Energy Efficient Scheduling Technique for Minimizing Data Collection 179-193
Delay of Multiple Sink in WSNs
Venu Madhav Kuthadi, Rajalakshmi Selvaraj and Tshildizi Marwala
