## CONTENTS

1. Design & Analysis of Dynamic Characteristics of Sepic Converter Based on Sliding Mode Control *T. Arputhamary* ..... 1-10
2. Seven-level Inverter for Photovoltaic Systems with a Control Strategy *K. Agalya* ..... 11-21  
*S. Hemapriya*  
*N. Lakshmi Prabha &*  
*N. Stalin*
3. Comparison of Modulation Techniques for a Three Phase Series Connected Asymmetrical Voltage Source Inverters *Lijo Jacob Varghese &* ..... 23-40  
*C. Kezi Selva Vijila*
4. Simulation of Eleven Level Inverter for Photovoltaic Application *L. Hubert Tony Raj &* ..... 41-53  
*R. Palanichamy*
5. Sliding Mode Observer-Based Speed Control of Brushless DC Motors With Hall-Effect Sensors *R. Velmurugan* ..... 55-63  
*K. Mahadevan &*  
*I. Gerald Christopher Raj*
6. Implementation of Pushpull Converter with AC Module Application *V. Shalini* ..... 65-76
7. Design and Analysis of Built-in Transformer Voltage Doubler Cell for Interleaved Soft Switched High Step-up Conversion *J. Christysudha &* ..... 77-90  
*T. Anuradha*
8. Harmonic Reduction in Voltage Source Inverter Using Improved Pulse Width Modulation Strategies *Anoop Kumar G.* ..... 91-101  
*I. Gerald Christopher Raj &*  
*S. K. Nandhakumar*
