Contents

1. A Review on Cadmium Selenide Nanomaterials and its Applications 1-15
   R. Divya, N. Manikandan and
   G. Vinitha

2. Genetic Algorithm based Tuning of Controllers for Superheater 17-25
   Steam Temperature Control
   A. Yasmine Begum and
   G.V. Marutheeswar

3. Design and Development of 8kW Solid State Transmit Receive Module for 27-37
   Gadanki Ionospheric Radar Interferometer
   M. Durga Rao, I. Srinivasa Rao, P. Kamaraj,
   R. Jagadeesh Kannan and A. Jayaraman

4. Optimum Shunt Active Power Filter based on Artificial Bee Colony Algorithm 39-46
   Rajesh Babu Yamarthi, R. Srinivasa Rao and
   P. Linga Reddy

5. Evaluating the Efficiency of Security Mechanisms in Cloud Environments 47-57
   D.M. Ajay and Umamaheswari E

6. Harmony Search Algorithm for Management of Contingencies based on 59-67
   Optimal Reallocation of Generators
   B. Sravana Kumar, M. Suryakalavathi and
   G.V. Nagesh Kumar
