GREEN FINANCING: KEY TO SUSTAINABLE GROWTH FOR INDIA

Amitabh Kant, Piyush Prakash,
Madhuri Pal

India will remain the fastest-growing economy (in terms of real Gross Domestic Product (GDP) in the world during 2021 to 24 (Economic Survey, 2021-2022). Indian economy is set to become the fifth-largest economy (nominal GDP) by 2025 and the third-largest by 2030. However, climate change poses a real serious threat to India's transition to a high-income economy. As per a World Bank report, rising temperatures and changing monsoon rainfall patterns from climate change could cost India 2.8 percent of GDP and depress the living standards of nearly half the country's population by 2050. In this backdrop, Green Financing appears to be a silver lining amidst India's march towards a developed economy. In this article we discuss the concept of green finance, its evolution in India, the impediments and way forward to drive the discourse on Green Financing for achieving the larger goal of Sustainable Development Goals 2030.

Green Financing: The Concept

Green Finance, as mentioned by RBI (2021) refers to the financial arrangements specific to the use of environmentally sustainable projects or projects that adopt the aspects of climate change. In other words, green finance is any structured financial activity built to provide

better environmental development. Green Finance constitutes instruments such as green bonds, carbon market tools e.g., carbon tax, and new financial institutions such as green banks to promote the development of green undertakings or minimize the impact on the climate of more regular projects. In the

increasing era of framing climate-friendly policies, green financing has emerged as the most innovative mechanism and is rapidly evolving as a priority for the public policy.

In the current period, Green Bonds, and Green Bank are considered as prominent mechanisms to finance the green projects. A Green Bond is a capital-raising tool that green banks can use and bonds like any other bonds that raise capital for green projects. A green bond is an instrument that a green bank institution can use. On the other side, Green Banks are financial institutions that generally issue bonds to expand additional capital above the government grants, deal in loans, and recapitalize their balance sheet.

Green Financing: The Need of the Time

The GDP is considered as the best indicator to analyse the state of the economy; however, it has its discontents. The calculation of the GDP, however, does not account for the aspects of environmental degradation and sustainability. The recent COVID-19 pandemic has offered

TACKLING JOINT ENTRANCE EXAMINATION MAIN & ADVANCED

Nidhi Prasad

With the completion of board exams, arrives the most crucial time in a student's life- appearing for various entrance exams. One such exam is the JEE-Main.

It is one of the most popular and competitive national-level entrance exams in India, conducted by the National Testing Agency (NTA) for students who wish to pursue a career in engineering.

WHAT IS JEE?

In 2013, the examination initially called the AIEEE (All India Engineering Entrance Exam) was renamed JEE (Main) and the IIT-JEE (Indian Institute of Technology- Joint Entrance Exam) was renamed to JEE (Advanced). The two exams are held to facilitate admission into undergraduate engineering programs like B.Tech, B.E,

B.Arch, B.Plan in IITs, NITs, IIITs and other government institutes.

Those who qualify the JEE-Main will be eligible to seek admission in colleges that accept the scores of that exam. Those seeking to gain admission into the top ranking colleges and institutes will have to qualify one more round of exam – the JEE-Advanced. Those who crack the JEE-Advanced can seek admission in the IITs. The JEE-

Advanced is organized by one of the seven "old" IITs (IIT Roorkee, IIT Kharagpur, IIT Delhi, IIT Kanpur, IIT Bombay, IIT Madras, and IIT Guwahati) under the guidance of the Joint Admission Board (JAB). It is the sole prerequisite for admission to the

Indian Institutes of Technology.

The JEE-Advanced score is also used as a possible basis for admission by Indian applicants to non-Indian Universities such as the University of Cambridge and National University of Singapore. Other prestigious universities—such as the Marine Engineering and Research Institute, Indian Institute of Petroleum and Energy (IPE), Rajiv Gandhi Institute of Petroleum Technology, Indian Institute of Space Technology (IIST), Indian Institute of Science Education and Research (IISERs), and Indian Institute of Science (IISc)—use the score obtained in the JEE-Advanced exam as the basis for admission.

GREEN FINANCING: KEY TO SUSTAINABLE ...

an additional opportunity for the concerned stakeholders to re-evaluate the financial strategies adopted till date and correspond to an environmentally sustainable system in the long run. According to the Swiss Re Institute, the world's economy faces an unprecedented loss of around 10% of total economic value and up to 18% could be wiped off global GDP by 2050. Remarkably, India is ranked fifth on the Global Climate Risk Index-2021, making her one of the most climate-vulnerable countries globally. India is also the world's third largest Green House Gas emitters (UNFCCC, 2021), though, nation's per capita emission is only 40% of the global average (World Bank, 2021) and accounts for only 3.2% of cumulative emissions (Friedlingstein et al., 2021).

In consideration of the significance of the climate crisis our Hon'ble Prime Minister in his address to the world leaders in the recently concluded Glasgow COP26 session in November 2021, committed to attaining net-zero emissions by 2070. The Prime Minister introduced the concept of "Panchamrit" as a part of the five-pronged commitments and drafted a towering ambition for India to derive 500 GW of energy from non-fossil sources by 2030, to reduce carbon intensity to 45%, and to lower projected carbon emissions by 1 billion tonnes between the year 2021 and 2030. Against this back-ground, developing a climate risk management system would enable investors and financiers

to make an informed capital allocation decision for the sectors that have the potential to mitigate climate change risks.

At the global level, the Paris Agreement has formerly emphasized scaling up action and efforts in fighting against climate crisis that includes "finance, capacity building and technology transfer, to enhance adaptive capacity, strengthen resilience and reduce vulnerability to climate change in line with the best available science, taking into account the priorities and needs of developing country parties". In the Glasgow COP26 summit, an open call has been made to build a sustainable and resilient future, and for that, every nation must begin reorganizing the association between the real economy and the financial services. The concept of Green Finance is essential to facilitate such a shift towards sustainable economic growth.

Green Bonds as one of the Green Finance instruments is a major aspect of the Green Finance. The global market had reached a total of USD 521 billion since the issue of the first green bonds in 2007 to finance climate change resolutions. Moreover, nearly 200 countries committed to mobilizing green finance under the 2015 Paris Agreement on climate change terms. The traded value of the green bond market worldwide is estimated at USD 2.36 trillion by 2023. The World Bank issued approximately USD 17 billion equivalent in Green Bonds

through over 200 bonds in 24 currencies.

Green Financing: Perspectives on the Indian Economy and Initiatives Taken

India is at a critical phase in scaling sustainable environmental projects to achieve the

mic growth. India has initiated its journey for carbon neutrality and put forward a whitepaper in November 2021 'Green New Deal for a Net Zero India' to be achieved by 2070. The 'Green New Deal' has classified green finance as an enabler to

NITI Aayog's Initiative to Decarbonize the Indian Transport Sector

NITI Aayog and World Resources Institute (WRI), India, with the support of GIZ India, conducted a virtual consultation workshop on 'Financing for Decarbonization of Transport' as part of the NDC-Transport Initiative for Asia (NDC-TIA) project on 22nd February 2022.

The aim of the workshop is to identify actionable strategies and bring together financing institutions and transport organizations to collectively work towards furthering innovative financing policies for the decarbonisation of transport.

It was the first of its kind platform where stakeholders from different sectors-public, private and think tanks collaborated to find way forward for promising green financial instruments.

It was stressed to bring national and international public and private financial institutions to leverage investments for shared e-mobility, which helps to decarbonize the economy.

Source: PIB

2030 targets. Financing is the principal barrier to the rapid expansion of India's sustainable ventures needed to support the ambitious and broader goals of the Paris Climate Agreement. The Council on Energy, Environment and Water (CEEW) projected that the achievements of the climate-friendly commitments will require investments upwards of USD 10 trillion to commit to net-zero by 2070. The investments aim to assist in decarbonizing the industrial, power, and transport sectors of India. Therefore, financing must be generous and affordable so that low-cost capital allows the Indian economy to transition to a sustainable, greener economy while facilitating steady econo-

mic growth. It emphasizes the need for an increased flow of capital from the national government and private entities to establish green infrastructure.

Since 2015 Indian economy has made an early mark in utilizing and implementing the policies of green finance as listed below:

- India entered the green bond market in 2015, with USD 1.1 billion of green bonds issued from a small set of pioneer issuers such as Yes Bank, Export-Import Bank of India, CLP Wind Farms, and IDBI and as of February 2020, the outstanding amount of green bonds in India stands at USD 16.3 billion.
- Since 2015 around 76% of the green bonds issued in India have been denominated in USD. Further, the World Bank has issued green bonds for several projects in India.
- The Reserve Bank of India (RBI) in 2015 incorporated

lending to social infrastructure and small renewable energy projects within the targets.

- RBI included the small renewable energy sector under its Priority Sector Lending (PSL) scheme in 2015. RBI has supported lending for renewable projects by entities up to Rs. 15 crores and up to Rs. 10 lakhs for private individuals.
- In January 2016, SEBI designed the framework for issuing green bonds and the corresponding listing requirements for such bonds.
- The government-backed Indian Renewable Energy Development Agency (IREDA), responsible for clean energy investments, declared to become India's first Green Bank in May 2016.
- Since January 2018, India has issued green bonds of approximately USD 8 billion, which constituted about 0.7 percent of all the bonds issued in the Indian financial market.
- State Bank of India (SBI) in 2018 issued USD 650 million Climate Bonds Certified and will be used to finance wind and solar energy projects across India, and SBI's Green Bond Framework includes a commitment to help the Indian government's clean energy target of 173GW by 2022.
- In India, several organizations such as Rural Electrification Corporation Limited (2017), Power Finance Corporation Ltd. (2017), Indian Railway Finance Corporation Ltd. (2017), Adani Renewable Energy Ltd. (2019) have issued green bonds with a maturity of 10 or more years while ReNew Power Pvt. Ltd. has issued green bonds with maturity period of lesser than five years in 2019.
- RBI, in 2021, entered as a member of the Network for Greening the Financial System ('NGFS'), a cluster of

Accelerating Urban Initiatives for a Carbon-free World

Sameera Saurabh

International Mother Earth Day provides an opportunity to raise global public awareness of the challenges to the well-being of the planet and all the life it supports. The Day also recognizes a collective responsibility, as called for in the 1992 Rio Declaration, to promote harmony with nature and the Earth, to achieve a just balance among the economic, social and environmental needs of the present and future generations of humanity. The UN General Assembly designated 22 April as International Mother Earth Day through resolution A/RES/63/278, adopted in 2009.

India is one among the largest urban systems in the world, with about 377 million people residing in urban areas (Census 2011) that form about 31.16% of the total population. It is estimated that Indian urban population would likely to reach a level of about 40% or 583 million by 2030, en-route adding 165 million people in its urban areas during 2015 to 2030 period. Due to its huge population, India is also among the current big emitters of greenhouse gases, with emission of 3.7 Gigatons of CO₂ equivalent and per capita emission of 2.7 tons CO₂ (per person per year) in 2019. But India's historical cumulative (1870-2017) CO₂ emission is very less, 3% compared to USA (25%), EU27+UK (22%) and China (13%).

According to the Global Climate Risk Index 2021, India was the seventh most-affected country by the devastating impact of climate change globally in 2019. India recognizes the place of cities in the country's transformation. In line with its commitment to implementing the Sustainable Development Goals, particularly of Goal 11, of making cities and human settlements inclusive, safe, resilient and sustainable and Goal 13 of taking urgent action to combat climate change and its impacts, it has already initiated steps to reinforce the urbanisation process for making cities work towards greater efficiency, inclusion and sustainability with low-carbon footprint.

Some important climate-related initiatives have been taken in India, including the National Action Plan on Climate Change (NAPCC) of 2008, the launching of the historic International Solar Alliance and the submission of the ambitious Intended Nationally Determined Contribution (INDC) which centre around India's policies and programmes on promotion of clean energy, resilient urban centres, promotion of waste to wealth, safe, smart and sustainable green transportation network, abatement of pollution and India's efforts to enhance carbon sink through creation of forest and tree cover. To achieve the INDC, India is committed to follow low-carbon path to progress and determined to continue with its on-going interventions, enhance the existing policies and launch new initiatives.

One of the major climate actions in the urban sector being implemented by the Government of India, is the National Mission on Sustainable Habitat (NMSH), one of the 8 Missions under NAPCC, and revised in 2019-20, which aims to promote low-carbon urban growth towards reducing GHG emissions intensity for achieving India's INDC; and building resilience of cities to climate change impacts and strengthening their capacities to 'bounce back better' from

climate related extreme events and disaster risks.

Cities are responsible for some 70 percent of global carbon dioxide emissions with transport, buildings, energy, and waste management accounting for the bulk of urban greenhouse gas emissions. All relevant stakeholders need to work together to create sustainable and inclusive cities and towns, and in the present times, need to reaffirm the global commitment in the form of COP21 Paris Agreement on Climate Change, Sustainable Development Goals, particularly Goal 11 which aims for inclusive, safe, resilient and sustainable cities by 2030; and Goal 13 which calls for taking urgent action to combat climate change and its impacts.

Further, the Habitat III New Urban Agenda also comprehensively lays out a broad, multilevel, and cross-sectoral framework with a spatial focus that can accelerate global climate action and provide the means to localise the SDGs. In view of this and in the context of global pandemic, the World Habitat Day and Earth Day offer new opportunities for all stakeholders to deliberate and brainstorm the global campaign 'Race to Zero' and UN-Habitat's 'ClimateAction4Cities' and encourage local governments to develop actionable zero-carbon plans as a follow-up to the international climate change summit COP26 in November 2021.

More than half (55%) of the world population of 7.6 billion, now lives in cities accounting for 78 per cent of energy consumption and generating over 70% of global CO₂ emissions. By 2030, about 60% world population will be in urban areas; and this rapid urbanization continues to fuel unwanted emissions, particularly from energy consumption, industrial activities and transportation.

It has been assessed that if international community is continuing the 'business as usual' attitude, global temperature will rise by more than two degrees Celsius in 2050 in which natural disasters with catastrophic proportion will occur. Moreover, climate change makes human settlements vulnerable, especially for economically weaker sections of the society and the urban poor who are exposed to and impacted by vagaries of extreme weather events.

A low-emission, resource-efficient greening of the economy with cost effective and aggressive low-emission strategy promises to deliver greater benefits. Developing Climate Change Assessment & Adaptation Framework for preventing urban environmental degradation, and disaster and financing measures for mitigation and adaptation actions assume prime importance.

Making Energy Efficient and Climate Resilient Cities through suitable interventions like building material with low carbon footprint, balanced planning of residential areas and growth centres, Energy Consumption Building Code and multi-level stakeholders engagement to create public awareness and mass participation in controlling pollution, waste management, etc. are some of the measures that are being promoted.

The Ministry of Housing and Urban Affairs, Govt of India has launched the "Climate Smart Cities Assessment Framework" in February 2019 for 100 Smart Cities, which is a guiding framework for cities towards climate actions and to help make them more responsive and less vulnerable to climate change. Various Government of India programmes like Green India Mission, National Clean Air Programme, Swachh Bharat Mission, Smart Cities Mission, AMRUT, PMAY, Urban Transport, etc. would support the cities in achieving the objective of being "Climate Smart". Various Missions launched particularly Swachh Bharat Mission, Smart Cities Mission and AMRUT, would not only make cities compact but would also help in accommodating growing demands for basic services of urbanites such as water, transportation, electricity, sewage treatment, solid waste management etc. in a more resource-efficient, low carbon and financially viable manner.

Urban Transport is a key ingredient of urban development as well as a key factor contributing CO₂ emission. For example, as per SAFAR research, the most dominating emission source of PM_{2.5} in Delhi is transportation (41%). Therefore, the issues of enhancing low-carbon emission mobility while minimizing time and distance on road and of redesigning transport networks need focus. In view of rapid growth in the number of private vehicles, the National Urban Transport Policy (NUTP) 2014 of India focuses on 'planning for people rather than vehicles', by providing sustainable mobility and accessibility to all citizens to places of work, education, social services and recreation at affordable cost and within reasonable time. This involves incorporating urban transportation as an important parameter at the urban planning stage rather than being a consequential requirement; introducing Intelligent Transport Systems (ITS) for traffic management; using alternative technologies such as e-vehicles; raising finances through innovative mechanisms; establishing institutional mechanisms; and building capacity for enhanced coordination in the planning and management of transport systems. There

is also growing recognition on the part of some cities for the need for transit-oriented development (TOD), i.e., that higher FSI (Floor Space Index) in and around transit nodes will improve intra-city access and connectivity of people's places of residence, work and recreation.

Buildings are responsible for nearly 40% of global greenhouse gas emissions. If we wish to achieve the Paris Agreement goal of keeping climate change below 2 degrees Celsius, we need to promote green buildings, as buildings consume 30% of final energy, out of which 22% stems from residential buildings, which is a big share but not surprising given that people spend most of their time at home, and now it has become 'new normal' due to COVID-19 Pandemic. Given that certified green buildings can deliver energy savings between 20-30 per cent and water savings of up to 30-50 per cent, we should attach greater importance to high-performing green buildings, as it strives to reduce greenhouse emissions by 33-35% (from 2005 levels). Therefore, the 'Technology Sub-Mission' (TSM) under PMAY-HfA(Urban) and the Global Housing Technology Challenge-India (GHTC) which promote and mainstream construction technologies that are sustainable, green and disaster resilient, and save time and cost are important initiatives undertaken by GoI.

We need to emphasize the need for enabling thermal comfort in mass housing projects which enhances natural ventilation, temperature and humidity control; improves liveability and health outcome in buildings. Therefore, there is a need for a new paradigm of planning and housing strategies that would enhance inclusive, healthy and sustainable housing. However, since the cost of these green buildings is a little higher than the normal houses, we need to find appropriate green financing mechanisms for enabling thermal comfort in mass housing. Banks/Financial Institutions like HUDCO, need to devise innovative green financing instruments such as Soft Green Mortgage Loans, Green Housing Bond, etc. for promotion of thermal comfort or green components in mass housing. As the greenhouse gases are increasingly threatening life on earth, it is the responsibility of cities to be the leaders of change to bring about the paradigm shift from unplanned urban settlements to planned human settlements; from high emission buildings to green buildings and build the roadmap to achieve the goals of a sustainable, economically healthy and decarbonized world with the help of data, technology, innovation and climate financing mechanisms.

There is a need to focus on finding ways and methods for promoting new and innovative low-carbon technologies, while ensuring housing for all, smart technology-based service delivery for all and better mobility with greener transport through smart urban governance, appropriate urban planning practice, innovative financing and placing people and human rights at the forefront of sustainable urban development so as to help build a carbon-free world.

(The author is Director at Ministry of Housing and Urban Affairs. She can be reached at sameera.saurabh@gmail.com)

India's Transition Towards Green Energy

Climate change represents a significant threat to the world economy. In India, it poses even bigger challenges due to heat stress, reductions in freshwater supply, soil drying, more intensive tropical cyclones, monsoons, and sea-level rise, amongst other impacts. Combating this would require a major or rather a complete transformation of the energy systems that underpin our economies.

The confluence of rising energy needs with a need for cleaner and cheaper energy resources to mitigate the consequences of a warming planet is enabling rapid growth for the renewable energy sector worldwide. India's energy system has changed significantly in the past two decades. The government's efforts to promote renewable energy technologies reflect a high level of policy support. In this context, India stands at a critical juncture as it lays the groundwork for one of the world's largest clean power systems.

A lot is said around the world about making the transition to cleaner sources of energy. To close the gap between rhetoric and action, the Government of India is spearheading several initiatives to decarbonize the existing energy systems, thereby reducing the overall carbon footprint.

What is Decarbonization?

The Cambridge Dictionary defines 'decarbonization' as "the process of stopping or reducing carbon gases, especially carbondioxide, being released into the atmosphere as the result of a process, for example, the burning of fossil fuels". Decarbonization is not just limited to the power sector. It goes a long way to further decarbonize the economy as the industries that play a crucial part in a country's economy reduce their dependence on fossil fuels and thereby reduce CO2 emissions.

Decarbonization is important because when industries rely heavily on fossil fuels they emit large amounts of carbon dioxide

Green Hydrogen & Green Ammonia Policy Step 1 of National Hydrogen Mission

Hydrogen and Ammonia: The Future Fuels To Replace Fossil Fuels Using Renewable Energy

OBJECTIVES

- ✦ Clean fuel to common people
- ✦ Reduce dependence on fossil fuel
- ✦ Reduce crude oil imports
- ✦ Emerge as export hub for Green Hydrogen/ Green Ammonia
- ✦ Produce 5 million tonnes of Green Hydrogen by 2030

India On Its Mission Of Environmentally Sustainable Energy Security Of Nation

leading to the greenhouse effect. However, if the industries shift to cleaner fuels, the amount of CO2 released into the atmosphere can be reduced significantly, which will also help in slowing down the effects of climate change.

The country achieved this target in November 2021 itself. The country's installed Renewable Energy (RE) capacity stands at 150.54 GW (solar: 48.55 GW, wind: 40.03 GW, Small hydro Power: 4.83, Bio-power: 10.62, Large Hydro: 46.51 GW) as on 30.11.2021,

EN EXPLAINS

In many comprehensive decarbonization pathways proposed for the world and for India, electrification of transportation, buildings, and industry is the principal solution to decarbonizing those sectors.

How is India moving towards Decarbonization?

At CoP21 (2015), as part of its Nationally Determined Contributions (NDCs), India had committed to achieve 40% of its installed electricity capacity from non-fossil energy sources by 2030.

while its nuclear energy based installed electricity capacity stands at 6.78 GW. This brings the total non-fossil based installed energy capacity to 157.32 GW which is 40.1% of the total installed electricity capacity of 392.01 GW.

In line with the Hon'ble Prime Minister's announcement at CoP26 (2021), the Government is committed to achieving 500 GW of installed electricity capacity from non-fossil fuel sources by the year 2030.

MAJOR PROGRAMMES AND SCHEMES

1. Pradhan Mantri Kisan Urja Suraksha evam Utthaan Mahabhiyan (PM-KUSUM): To provide energy and water security, de-dieselise the farm sector and also generate additional income for farmers by producing solar power, the Government launched PM-KUSUM Scheme for farmers. The scheme consists of three components:

- Component A: Installation of 10,000 MW of Decentralized Grid Connected Solar Power Plants each of capacity up to 2 MW
- Component B: Setting up of 20 lakh standalone Solar Powered Agriculture Pumps
- Component C: Solarisation of 15 Lakh existing Grid-connected Agriculture Pumps

The Scheme aims to add 30.8 GW of solar capacity with the central financial support of over Rs. 34,000 crore.

2. Production Linked Incentive (PLI) Scheme: In April 2021, the Government introduced PLI Scheme "National

Programme on High-Efficiency Solar PV Modules" with an outlay of Rs. 4,500 crore to support and promote manufacturing of high-efficiency solar PV modules, including the upstage vertical components like cells, wafers, ingots and polysilicon in India, thereby reducing the import dependence in the Solar Photo Voltaic (PV) sector.

3. Solar Parks Scheme: To facilitate large scale grid-connected solar power projects, a scheme for "Development of Solar Parks and Ultra Mega Solar Power Projects" is under implementation. Solar parks provide solar power developers with a plug and play model, by facilitating necessary infrastructure like land, power evacuation facilities, road connectivity, water facility, etc., along with all statutory clearances.

4. Roof Top Solar programme Phase-II: Roof Top Solar programme Phase-II for accelerated deployment of solar rooftop systems is also under implementation. The scheme provides for financial assistance of upto 4 GW of solar rooftop capacity to the residential sector and there is a provision to incentivise the distribution companies for incremental achievement over the previous year. For the residential sector, use of domestically manufactured solar cells and modules have been mandated. This scheme is expected to act as a catalyst for adding solar cell and module manufacturing capacity in India.

5. Central Public Sector Undertaking (CPSU) Scheme: The scheme paves way for setting up 12 GW Grid-Connected Solar PV Power Projects by Central Public Sector Undertakings with domestic cells and modules. Viability Gap Funding support is provided under this scheme. Apart from adding solar capacity, the scheme will also create demand for domestically manufactured solar cells/modules, and thus help domestic manufacturing.

6. Atal Jyoti Yojana (AJAY): The Ministry of New and Renewable Energy (MNRE) launched the AJAY to illuminate dark regions by installing solar street lights. Energy Efficiency Services Limited (EESL) is implementing this sub-scheme under the Off-Grid and Decentralized Solar Application Scheme of MNRE. The objective is to illuminate the rural, semi-urban and urban areas with solar LED street lights that face less than 50% grid connectivity as per 2011 census.

7. Green Energy Corridor: In order to facilitate renewable power evacuation and reshaping the grid for future requirements, Green Energy Corridor (GEC) projects have been initiated. The first component of the scheme, Inter-state GEC with target capacity of 3,200 circuit kilometer (ckm) transmission lines and 17,000 MVA capacity sub-stations, was completed in March 2020. The second component, Intra-state GEC with a target capacity of 9,700 ckm transmission lines and 22,600 MVA capacity sub-stations is expected to be completed by June 2022.

#AatmanirbharBharatKaBudget

Takeaways for RE Sector in Budget 2021

National Hydrogen Mission

Major Activities envisaged

- Creating volumes and infrastructure
- Demonstrations in niche applications (including for transport, industry)
- Goal-oriented Research & Development; facilitative policy support
- Putting in place a robust framework for standards and regulations for hydrogen technologies
- Envisages generation of hydrogen from green power sources
- Aims to develop India into a global hub for manufacturing of hydrogen and fuel cells technologies
- The Government of India will facilitate demand creation in identified segments. Possible areas include suitable mandates for use of green hydrogen in industry such as fertilizer, steel, petrochemicals etc

Continued from Page 4

India's Transition Towards Green Energy

8. Several bio-energy schemes are also under implementation by the MNRE such as the Programme on Energy from Urban, Industrial and Agricultural Wastes/Residues, scheme to support Promotion of Biomass based cogeneration in sugar mills and other industries, Biogas Power (Off-Grid) Generation and Thermal application Programme (BPGTP), and New National Biogas and Organic Manure Programme (NNBOMP).

NATIONAL HYDROGEN MISSION

On India's 75th Independence Day, the Prime Minister announced the launch of National Hydrogen Mission (NHM) and stated the goal to make India a global hub for Green Hydrogen production and export.

Hydrogen, like electricity, is an energy carrier that must be produced from another substance. Hydrogen can be produced-separated-from a

variety of sources including water, fossil fuels, or biomass and used as a source of energy or fuel. Hydrogen has the highest energy content of any common fuel by weight (about three times more than gasoline), but it has the lowest energy content by volume (about four times less than gasoline).

The Mission proposes a framework for, inter alia, creating demand for Green Hydrogen in sectors such as petroleum refining and fertilizer production, support for indigenous manufacturing of critical technologies, research and development activities, and an enabling policy and regulatory framework. The aim is to develop India as a global hub for manufacturing of hydrogen and fuel cells technology across the value chain.

Major activities envisaged under the mission include creating volumes and infrastructure; demonstrations in niche applications including

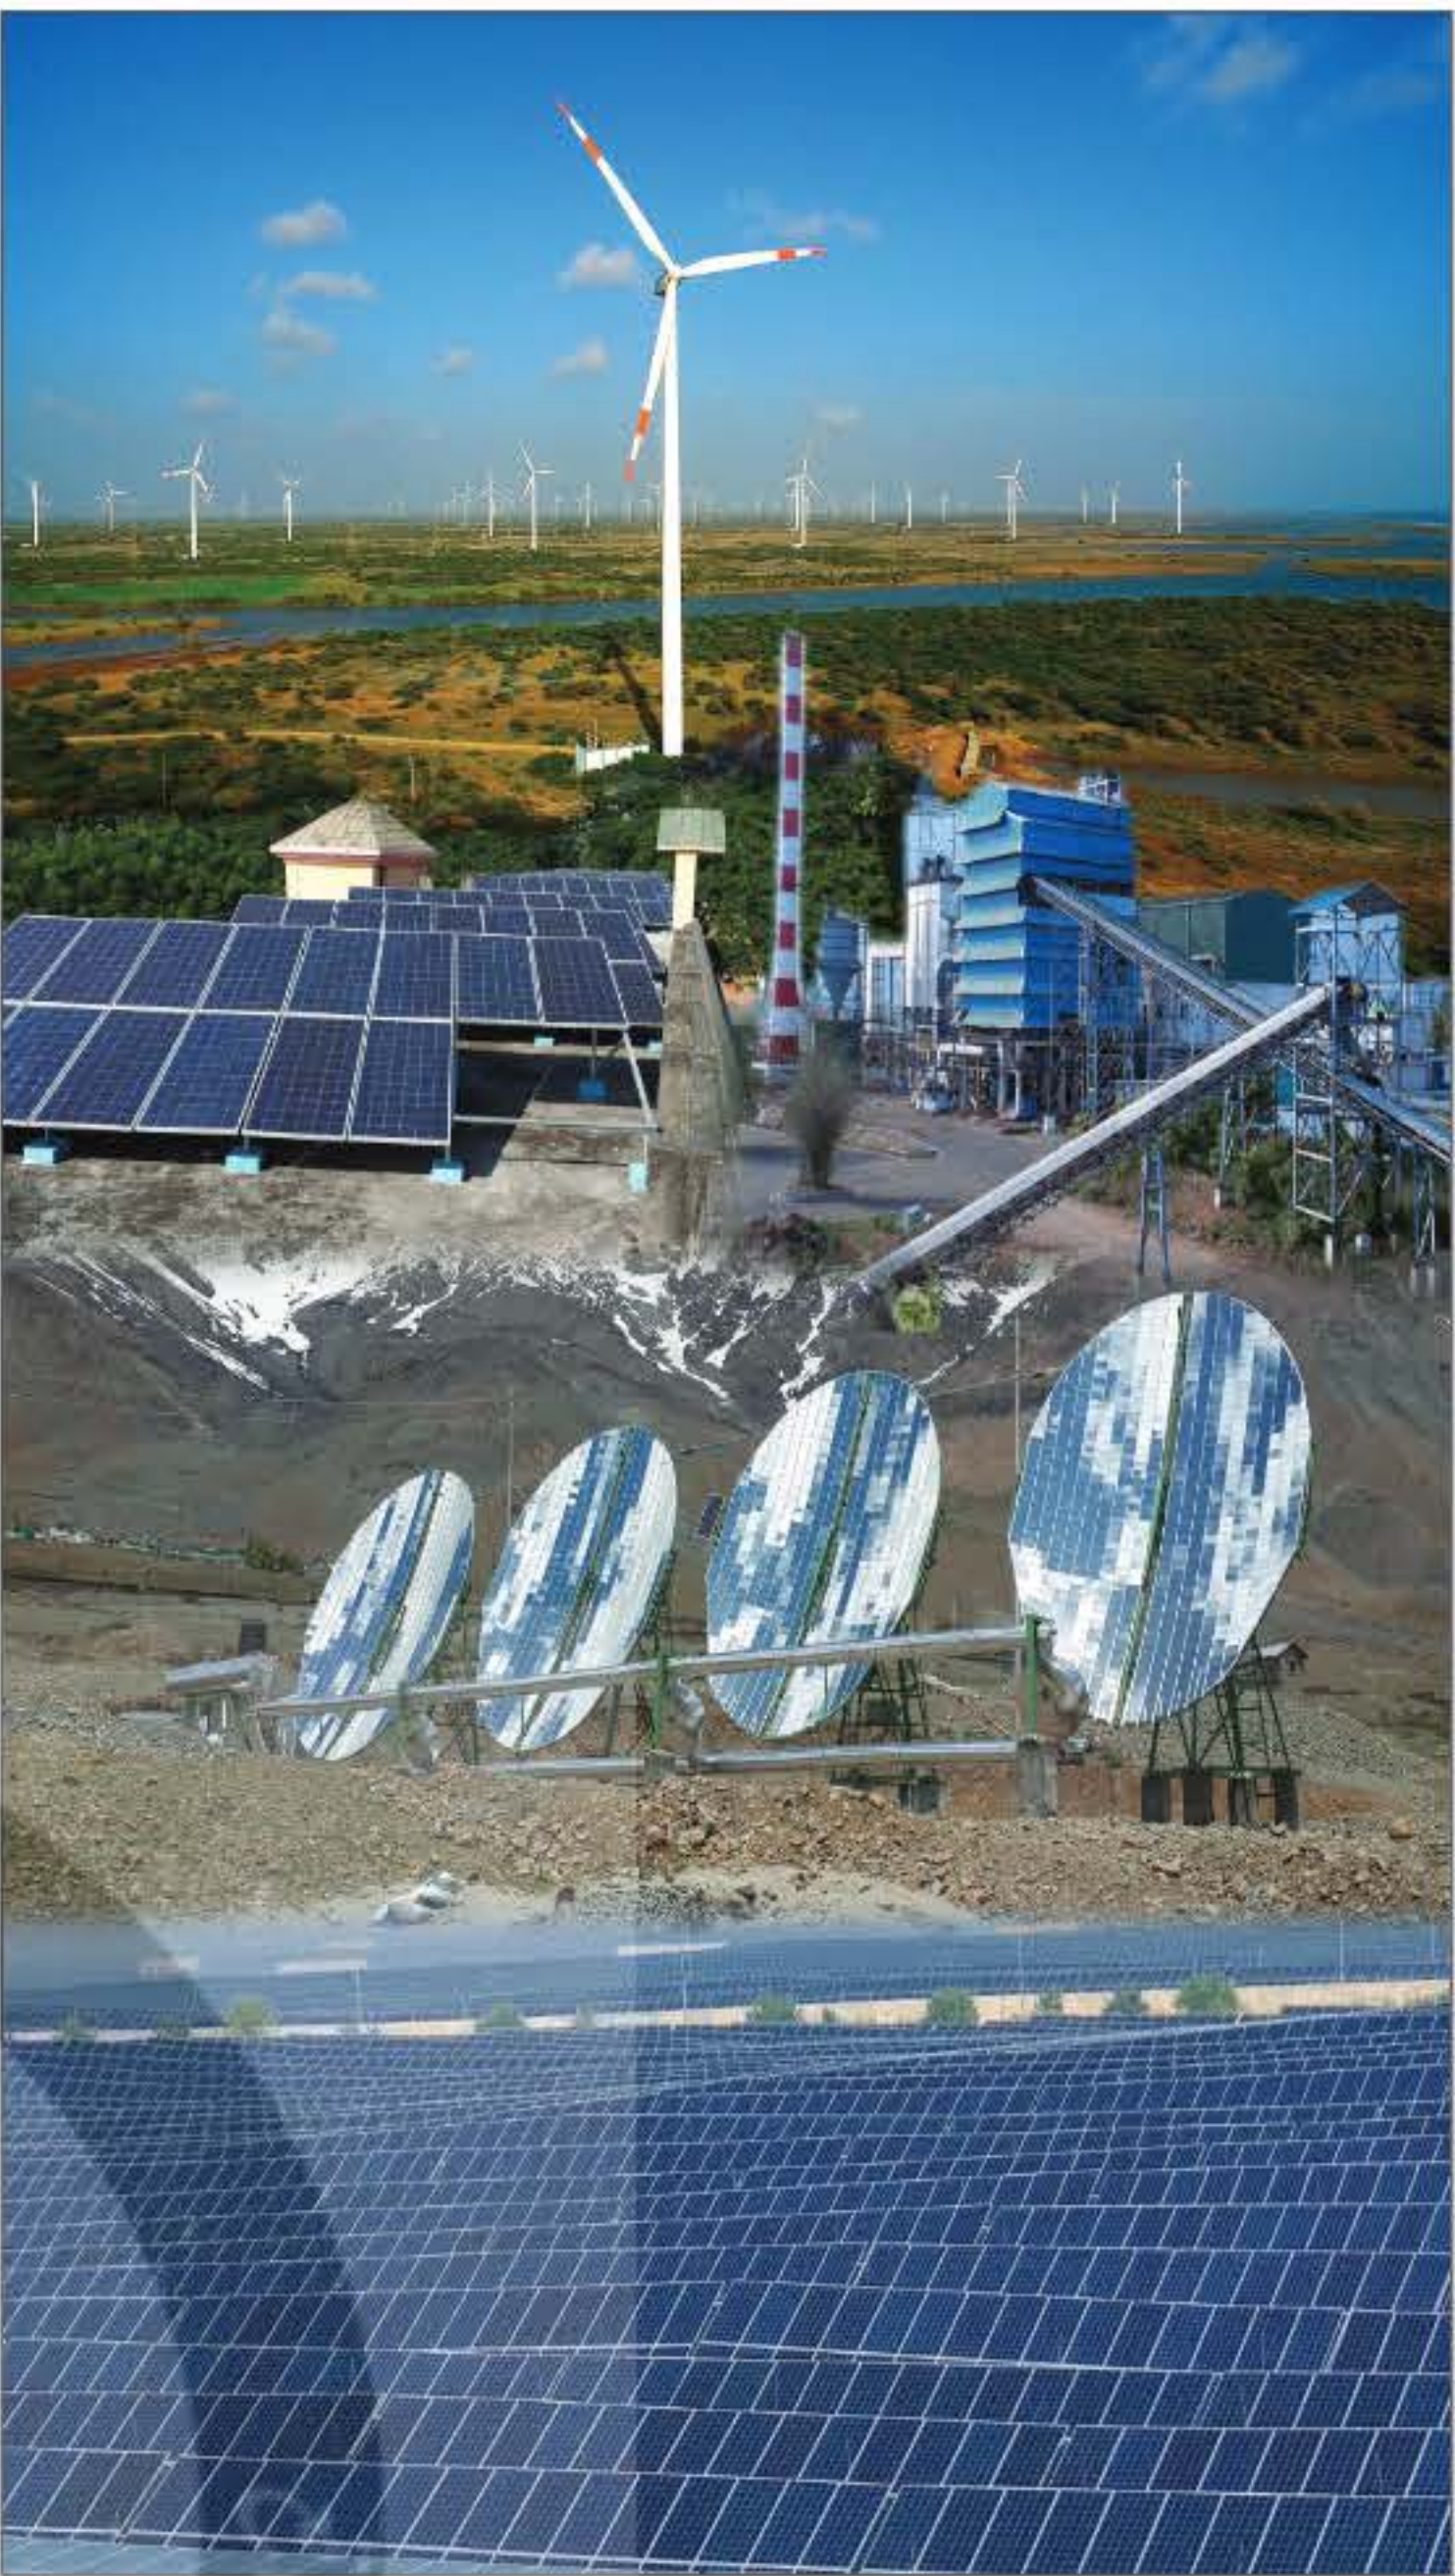

transport and industry; goal-oriented research & development; facilitative policy support; and putting in place a robust framework for standards and regulations for hydrogen technologies. The mission aims to aid the Government in meeting its climate targets and making India a green hydrogen hub. This will help in meeting the target of production of five million tonnes of Green hydrogen by 2030 and the related development of renewable energy capacity.

Hydrogen and Ammonia are envisaged to be the future of fuels and are envisaged to replace fossil fuels in the years to come. One of the major requirements of environmentally sustainable energy security of the nation is production of these fuels by using power from renewable energy sources. This is known as Green Hydrogen and Green Ammonia. Transitioning to Green Hydrogen and Green Ammonia is one of the major requirements for reduction of emissions. In this regard, a Green Hydrogen Policy has been framed by the Ministry of Power for compliance and implementation by concerned stakeholders.

The Hon'ble Prime Minister aims to transform India into an energy independent nation by 2047 where Green Hydrogen will play an active role as an alternate fuel to petroleum/fossil-based products.

Other Policies and Initiatives

- Waiver of Inter State Transmission System (ISTS) charges for inter-state sale of solar and wind power for projects to be commissioned by June 30, 2025.
- Keeping in view India's long-term goals of decarbonising the electricity systems, and achieving energy security, and in keeping with our international commitments, in July 2016, long term Renewable Purchase Obligation growth trajectory, uniformly applicable to all States/UTs up to the year 2021-22, was notified. Further, the Ministry of Power in January 2021 included Hydropower Purchase Obligation (HPO) within Non-Solar Renewable Purchase Obligation (RPO) and notified the long term updated RPO trajectory from 2019-20 to 2021-22, including HPO till 2029-30.
- Competitive Bidding guidelines for procurement of

solar and wind power have been notified under section 63 of Electricity Act, 2003. These Guidelines provide for standardization and uniformity of the procurement process and a risk-sharing framework between various stakeholders, thereby encouraging investments, enhancing bankability and improving profitability for projects. The Guidelines also facilitate transparency and fairness in the procurement processes which have resulted in the drastic fall in solar and wind power prices over the past few years.

- International Solar Alliance (ISA) was launched by the Hon'ble Prime Minister and the President of France in 2015 at Paris, France. ISA is the first international intergovernmental organization to be headquartered in India. The objective is to increase deployment of solar energy technologies as a means for bringing energy access, ensuring energy security, and driving energy transition in its member countries.
- One Sun, One World, One Grid (OSOWOG): The idea for the One Sun One World One Grid (OSOWOG) initiative was put forth by the

Hon'ble Prime Minister at the First Assembly of the International Solar Alliance (ISA) in October 2018. The United Kingdom and India agreed to combine forces of the Green Grids Initiative and the OSOWOG initiative and jointly launch GGI-OSOWOG at the COP26 summit in November 2021. It envisions building and scaling inter-regional energy grids to share solar energy across the globe, leveraging the differences of time zones, seasons, resources, and prices between countries and regions. OSOWOG will also help decarbonise energy production, which is today the largest source of global greenhouse gas emissions. OSOWOG is also aimed at addressing the issue of high cost of energy storage.

India has a huge edge in green hydrogen production owing to its favourable geographic conditions and the presence of abundant natural elements. A shift to large-scale use of hydrogen fuel can help bolster India's geopolitical heft and support energy security.

Central Information Commission

बाबा गंगनाथ मार्ग/Baba Gangnath Marg

मुनिरका/Munirka, नई दिल्ली-110067/New Delhi- 110067

Dated: 24.03.2022

CIRCULAR

The Central Information Commission, quasi-judicial authority, requires **Sr. Principal Private Secretary & Principal Private Secretary** on Deputation (ISTC)/absorption basis and **Section Officer & Private Secretary on Deputation (ISTC)** basis.

The required qualifications for these posts have been indicated below against each of them-

(1) Name of the Post: Sr. Principal Private Secretary

a.) No of Post(s): 03 (01 post on Deputation (ISTC) and 02 posts on Deputation (ISTC)/ absorption basis)

b) Level in the pay matrix : Level 12 in the pay matrix.

c) Eligibility : Stenographers of the Central Government/State Governments/ Union Territory Administrations/ Public Sector Undertakings/ Universities/ Recognized Research Institutions/ Semi Government or Autonomous Bodies/Statutory Organizations:-

(i) Holding analogous posts on regular basis in the parent cadre or department; or

(ii) With five years' service in the grade rendered after appointment thereto on regular basis in Level-11 in the Pay Matrix or equivalent in the parent cadre or department.

2) Name of the Post : Principal Private Secretary

a) No. of Post : 03 (02 posts on Deputation (ISTC) and 01 post on Deputation (ISTC)/absorption basis)

b) Level in the pay matrix : Level 11 in the pay matrix.

c) Eligibility : Stenographers of the Central Government/State Governments/Union Territory Administrations/Public Sector Undertakings/Universities/ Recognized Research Institutions/Semi Government or Autonomous Bodies/Statutory Organizations:-

(i) Holding analogous posts on regular basis in the parent cadre or department; or

(ii) With five years service in the grade rendered after appointment thereto on regular basis in the Level-10 in the Pay Matrix or equivalent in the parent cadre or department; or

(iii) With six years service in the grade rendered after appointment thereto on regular basis in the Level-8 in the Pay Matrix or equivalent in the parent cadre or department.

(3) Name of the Post : Section Officer

a) No. of Post(s) : 08

b) Level in the pay matrix: Level 8 in the pay matrix.

c) Eligibility: Officers of the Central Government or State Government or Union Territories or Public Sector Undertakings or Universities or Recognized Research Institutions or Semi Government or Autonomous Bodies or Statutory Organizations:-

(a)(i) Holding analogous posts on regular basis in the parent cadre or department; or

(ii) With eight years service in the grade rendered after appointment thereto on regular basis in posts in Level-7 in the Pay Matrix or equivalent in the parent cadre or department ; and

(b) Possessing the following Educational Qualifications and Experience, namely:-

(i) Graduation from a recognized university; and

(ii) Two years experience in the field of Administration or Finance and/or in dealing with Right to Information matters.

(4) Name of the Post : Private Secretary

(a) No. of Post(s): 08

(b) Level in the pay matrix : Level 08 in the pay matrix.

(c) Eligibility: Stenographers of the Central Government/State Governments/ Union Territory Administrations/ Public Sector Undertakings/ Universities/ Recognized Research Institutions/Semi Government or Autonomous Bodies/ Statutory Organizations:-

(i) Holding analogous posts on regular basis in the parent cadre or Department; or

(ii) With five years' service in the grade rendered after appointment thereto on regular basis in posts in Level-7 in the Pay Matrix or equivalent in the parent cadre or department.

General Conditions:

Note: 1: The departmental officers in the feeder category who are in the direct line of promotion will not be eligible for consideration for appointment on deputation. Similarly, deputationists shall not be eligible for consideration for appointment by promotion.

Note 2: (a.) For the posts of Sr. Principal Private Secretary and Principal Private Secretary:-

period of deputation (including short term contract) including period of deputation (including short-term contract) in another ex-cadre post held immediately preceding this appointment in the same or some other organization or Department of the Central Govt. shall ordinarily not to exceed four years.

(b) For the posts of Section Officer and Private Secretary :-

Period of deputation including short term contract including period of deputation (including short-term contract) in another ex-cadre post held immediately preceding this appointment in the same or some other organization or department of the Central Government shall ordinarily not to exceed three years.

Note 3 : The maximum age limit for appointment by deputation including short-term contract shall be not exceeding 56 years as on the closing date of receipt of applications.

Note 4: Only officers from central or State Governments or Union Territories will be considered for absorption.

2. Application must be sent in the Bio-data/Curriculum Vitae Proforma as per Annexure-I of DoP&T OM No. AB.14017/28/2014-Estt.(RR) dated 02.07.2015 to Deputy Secretary (Admn), Central Information Commission, 5th Floor, Baba Gangnath Marg, Munirka, New Delhi-110067. This proforma can be downloaded from Central Information Commission's website www.cic.gov.in

Continued from Page 2

GREEN FINANCING: KEY TO SUSTAINABLE ...

nationalized banks that support the transition to a green economy through practices that promote the progress of the environment climate-related risks in the financial sector.

- SEBI leaped ahead and placed forward the 'Business Responsibility and Sustainability Report' (BRSR) in 2021 to improve environmental, Social, and Governance (ESG) standards disclosure. BRSR is obligatory from the financial year 2022-23 and is meant to apply to the top one thousand enterprises. The BRSR framework employs international ESG standards such as the Global Reporting Initiative (GRI) and presents both qualitative and quanti-tative data.

- The Government of India's apex policy-making body NITI Aayog and World Resources Institute (WRI), India, with the support of GIZ India, is working towards decar-bonizing transport, with a significant focus on adopting green financing that facilitates low-interest financing of electric vehicles. It has organised a consultation work-shop in February 2022.

Green Financing: The Road-blocks

According to the Economic Survey 2019-2020, India is the second-largest market globally for green bonds, with USD 10.3 billion worth of transactions in the first half of 2019. However, in India, Green finance is still in the developing stage, where green bonds comprised 0.7% of all the bonds issued since 2018, while bank lending to non-conventional energy is about 7.9% of outstanding bank credit to the power sector as of March 2020. The major challenges pertaining to the issue of green finance are:

- The cost of issuing green bonds in India since 2015 has remained higher than the corporate and government bonds with similar tenure. The average coupon rate for green bonds with maturities between 5 to 10 years has remained higher than government and corporate bonds for a similar tenure.

- Green finance lacks a universal definition and suffers from information asymmetry that often results in "green-washing", wherein the investors receive inaccurate indications about the green bonds.

- There is a severe mismatch in the maturity period of the green projects and their financing, which often leads to increased borrowing costs and the currency risks for foreign investors.

- There is an elevated risk due to the absence of details within the domestic banking sector about innovative climate-friendly technologies.

Green Financing: The Way Forward

Based on the concerning issues, following suggestions can be viewed as a way forward:

- Proposing flexible and affordable lending products that correspond to green projects' terms and payback period, thereby reducing the cost.

- Extensive research on the market growth and demand generation for the greener infrastructure to identify the core issues in developing green economy.

- India should focus on establishing Green Banks that adhere to the mandate of green investment, specialized green underwriting expertise, and public sources of capital. The Green Bank facilitates lower lending rates and offers flexible terms to correspond to green projects' terms and payback period.

Conclusion

The Indian economy is looking forward to a huge leap as it advances towards a USD 10 trillion economy by 2030 from the present USD 2.75 trillion economy - an increase of 263% in less than 8 years. Such an exponential expansion is an arduous task in itself. The ambitious climate change commitments by India (such as lowering projected carbon emissions by 1 billion tonnes in the next decade) have made this kind of expansion even more challenging. Green Financing with instruments such as the Green Banks and Green Bonds could prove to be the silver bullet provided there are proactive regulatory reforms in green financing terms and conditions. A massive discourse needs to be initiated at the national and international fora to make Green Financing a national priority. These financial tools would accelerate India's climate resilience projects while realising the five-pronged commitment (Panchamrit) of Hon'ble Prime Minister of India and thus achieving the environmental goals for the investors, for the government and for us-the citizens of the Earth!

(Amitabh Kant, CEO NITI Aayog, Piyush Prakash, Sr. Associate, NITI Aayog & Madhuri Pal, Associate, NITI Aayog)

Views expressed are personal

3. Application duly filled in and supported by all relevant documents and envelop should be superscripted: "Application for the post of _____ on deputation or deputation (including short-term contract) or absorption basis."

4. While forwarding applications, the Confidential Reports (Photocopies of the CRs/ APARs each page duly attested by the officer not below the rank of Under Secretary to the GOI) for the last five years, Cadre clearance, Vigilance Clearance and Integrity Certificate and Statement showing Major or Minor penalties, if any, imposed during the last ten years, may positively be furnished by the sponsoring authority.

5. Applicants will not be allowed to withdraw their candidature at a later date. Incomplete applications or applications received without up to date APAR dossiers, Cadre Clearance, Vigilance Clearance and Integrity Certificate (duly attested each page by the officer not below the rank of Under Secretary) will not be entertained.

6. The Officers selected will have the option to draw his/her pay plus deputation (duty) allowance or to have his/her pay fixed in the scale/level of the post in accordance with DoPT O.M. No.2/12/87- Estt (Pay II) dated 29.04.1988, as amended from time to time.

7. The last date of receipt of application in the Commission is 45 days from the date of publication of the advertisement in Employment News.

Application Procedure

2. Application Form duly typed or neatly hand written in prescribed format only, filled preferably in English in all respect along with a self-addressed envelope (not smaller than size 23 cm X 10 cm) duly affixed with appropriate stamp, all relevant attested photocopy of documents supporting the application such as Class X pass certificate or mark sheet/birth certificate, qualification documents, Category Certificate including Non Creamy layer declaration as per Annexure-I, experience certificate where desirable, Ex-Servicemen certificate including Discharge Certificate & Undertaking in format as per Annexure-II and four recent (not more than 3 months old) passport size photo (in white back ground) in addition to the one pasted in the application with name, category & post applied for written at the back to be submitted by Registered/Speed/Ordinary Post (through Indian Postal Service only in an envelope not smaller than 30 cm X 21 cm) addressed to "SELECTION BOARD GP'C' POST JAK RIF REGIMENTAL CENTRE JABALPUR CANTT PIN 482001". No application will be accepted by hand.

3. Application is required to reach by 18 May 2022 after which no application will be accepted. This office will not be responsible for any postal delay or loss of application in transit.

4. Applicants should write "APPLICATION FOR THE POST OF (Name of the post)" on the top cover of envelop in block capital letters.

5. Separate advertisements are being published for vacancy of Army Gp 'C' posts at Jammu and Kashmir Rifles Regimental Centre. Applicants are advised to apply for a single post as tests for all posts will be conducted simultaneously. No separate test will be conducted for candidates applying for more than one post.

The Centre will not be accountable for multiple appln being accepted as individual can appear for exam of only one post at a time.

6. Candidate is permitted to apply for a post in only one Regimental Centre falling under HQ Madhya Bharat Area.

7. **Scrutiny of Application.** The applications falling under conditions stated as under will be dealt accordingly:

(a) Incomplete application will be rejected.

(b) Application not conforming with the format will be rejected.

(c) Application without relevant attested photo copy of documents supporting the application as mention in para 2 above will be rejected.

(d) Application sent by any other mode except Speed/Registered/Ordinary post (through Indian Postal Service only).

(e) Dissimilar photos submitted with the application will not be accepted.

Selection Procedure

8. Merely fulfilling the basic essential qualification requirement & submission of application does not entitle an applicant to be called for written test. Screening of application on the basis of percentage of marks obtained in the minimum essential qualification as prescribed in Recruitment Rules for the Grade / Post may be resorted to, to restrict the number of candidates for written test to 50 times the number of vacancies. The eligibility of the applicant will be reckoned strictly in accordance with recruitment rules for the post. No extra weightage will be given for additional/extra/higher qualification (other than those prescribed in the Recruitment Rules).

9. Call letter for written test will be issued to applicants screened in after scrutiny by Board of Officers.

Applicants not receiving the call letter for written test will automatically be considered rejected & no intimation in any form will be made or enquiry for the same, entertained. Call letter issued for written test will have the date, time & venue of written test. This office will not be responsible for any postal delay or failure.

10. No TA/DA will be admissible. Candidates will make their own arrangements for lodging/boarding.

Written test and skill test will be conducted at JAK RIF Regtl Centre Jabalpur only.

11. SC/ST/OBC candidates who apply against unreserved post will not be given age & other concession meant for SC/ST/OBC.

12. SC/ST/OBC candidates selected on merit vis-à-vis the general candidates will not be counted towards SC/ST/OBC quota.

13. The syllabus of written & skill test will be based on latest policy issued by IHQ of MoD (Army)/DoPT. The question-cum-answer sheet will be both in Hindi & English.

14. The candidates who qualify written test and come in the Rank list will be called for physical/skill test. The number of candidates called for skill test/practical test may be restricted to 10 times the number of vacancies to be filled. Applicants who appeared in written test but were not called for skill test will automatically be considered rejected & no intimation in any form will be made or inquiring entered.

15. There will be No re-evaluation & re-checking of the written test and re-conduct of skill test if candidate is absent or does fulfil COVID-19 protocol norms. No correspondence in this regard will be entertained.

Important Instructions to the Applicants

16. The decision of Appointing Authority in all matters relating to eligibility acceptance or rejection of the application, penalty for false information, malpractice in exam, mode of selection of suitable candidates, allotment of post to selected candidates will be final and binding and no enquiry/ correspondences will be entertained in this regard.

17. Unit will not be responsible to pay any compensation in case of injury/death of applicant during & after physical tests & also reserves be right to reschedule the date of physical/skill/written test due to strike/bandle/curfew/bad wx/any other administrative reasons.

18. Post is permanent subject to completion of two years probation period successfully by the individual.

19. Any dispute with regarding recruitment will be subject to jurisdiction of High Court Jabalpur only.

20. Applicants living with/having more than one spouse are not eligible to apply for govt service and liable for termination of services.

21. Imposter will be handed over to police custody.

22. The candidature will be cancelled if candidate does not report to this Centre within given time frame.

23. **Caution to all Applicants.** Some unscrupulous elements may approach you with the assurance of procuring appointment through illegal gratification. You must not fall prey to such false assurance or exploitation and must not entertain or encourage such elements in any way. It is emphasized and reassured that Skill/ Physical/Practical and written test will be done in a transparent manner and the selection shall be done purely on merit of applicant.

24. Selected candidates will be subject to all India Service liability.

25. The Appointing Authority has the right to reject any application without assigning any reason.

COVID-19 Instructions

26. To avoid the risk of COVID-19 & its variants, candidates are advised to follow all instruction/guidelines issued by Central/State Govt for prevention of COVID-19. At the entrance, any applicant or one accompanying the applicant showing complaints of influence like illness (ILI) may not be allowed for the test considering the safety of other persons.

DIRECTOR

9. For all other information in detail such as eligibility criteria, reservation benefits & relaxations, selection of candidates/scheme of examination, resolution of tie cases, how to apply, submission of online application, mode of payment and other instructions, the candidates are advised to refer to our detailed advertisement available on the website of MHA (www.mha.nic.in).

10. **CLOSING DATE:** 07.05.22 (till 2359 hours).

WARNING

It has been noticed that some unscrupulous elements are fraudulently inviting applications for various posts in the Intelligence Bureau. Such elements are also alluring the aspirants appearing in various written examinations conducted by IB for providing assistance during the examination and are even issuing fake appointment letters to some of the candidates. The prospective candidates/job aspirants are, therefore, cautioned not to fall prey to the designs of such unscrupulous elements who are trying to dupe the unsuspecting aspirants / candidates for their personal gain. Candidates are advised to apply through the website of MHA only i.e. www.mha.nic.in.

Creating an Energy Efficient World

Adv. Ref. No.: EESL/0320/27

Date: 04/04/2022

NOTICE**SUBJECT - SELECTION OF CHIEF EXECUTIVE OFFICER OF EESL**

Applications are invited from eligible Indian Nationals for appointment to the post of **Chief Executive Officer of EESL** to be posted at the Corporate Office of EESL presently in New Delhi.

Company Profile: EESL is a Joint Venture Company of NTPC Ltd., Power Grid Corporation of India Ltd., Power Finance Corporation Ltd. and Rural Electrification Corporation Ltd. EESL is set up to create and sustain markets for energy efficiency in the country. EESL works closely with Bureau of Energy Efficiency (BEE) and is leading the market related activities of the National Mission for Enhanced Energy Efficiency (NMEEE), one of the 8 national missions under Prime Minister's National Action Plan to Climate Change. Energy Efficiency Services Limited (EESL) is a Super-Energy Service Company (ESCO), which enables consumers, industries and governments to effectively manage their energy needs through energy efficient technologies. EESL is implementing the world's largest non-subsidised energy efficiency portfolio across sectors like lighting, buildings, e-mobility, smart metering and agriculture. EESL focuses on solution-driven innovation with no subsidy. EESL has a net worth of over INR 11 billion (As per Provisional Financial Results for the year ended 31.03.2021).

EESL has seen an impressive growth over the years. In last 10 years, EESL has accomplished many milestones including becoming world's largest Energy Efficiency portfolio, entry into 7+ countries, executing largest non-subsidy based LED lighting program in the world & increase India's share in the global LED market from 0.1% to 12%. EESL is the world's largest street light management company managing over 1.02 crore street lights in the country. In addition, EESL has initiated programs in decentralized solar, EVs, Smart meters and also has business presence in UK, Saudi Arabia, Thailand, Maldives, etc.

PROCEDURE FOR APPLYING

Candidates are required to read the GENERAL INSTRUCTIONS before filling up the online application form.

The Candidates are required to apply online. The relevant link for online application will be made available from 10:00 hrs on 06.04.2022 under the head "CAREER within Human Resources" on NBCC website i.e. www.nbccindia.in. Final Online submission of application will be open till 17:00 hrs on 05.05.2022 No other means/mode of application shall be accepted.

Opening Date for Online Registration	06.04.2022 from 1000 hrs
Closing Date of Online Registration	05.05.2022 upto 1700 hrs

Before filling application online, candidates should keep ready scanned copy of –

- Passport size Photograph (Size 40 KB to 100 KB) & Signature in jpg/jpeg format (Size 20 KB to 50 KB).
- SC/ST/OBC (NCL)/EWS/PWD certificate, if applicable. (Size 100 KB to 300 KB).
- Matriculation/Secondary certificate as proof of date of birth.
- All necessary Pass Certificates and Mark Sheets of Essential Educational Qualifications which makes you eligible for the post and other qualifications, if any.
- All Post Qualification Experience Certificate, if applicable (including from present employer) indicating clearly the date of joining and relieving of the posts (e.g. Experience Certificate, Last 3 months Pay Slip, Form-16, Joining/Relieving Order etc). Candidates must keep his e-mail ID in operation at least for one year. Candidates are required to give correct email address. In case of non delivery or late delivery of email due to any reasons whatsoever, Company will not be held responsible.

Fill in the online form with all the relevant details. Upload scanned copy of the photograph; signature, SC/ST/OBC (NCL)/EWS/PWD certificate, (if applicable) & all the Essential educational & post qualification experience documents, (if applicable) as mentioned above. Candidates should ensure that the relevant details viz. Name, Date of Birth, Address, etc. entered in NBCC online application form is correct. Incomplete application will be summarily rejected. Any request to add additional information in application form after the application has been submitted shall not be entertained in any condition.

Detailed procedure regarding payment of fee is explained under "PAYMENT OF APPLICATION FEE".

PAYMENT OF APPLICATION FEE

- Applicants/Candidates are required to pay a non-refundable amount of Rs. 1000/-. Candidates will be levied tax/charge from their transaction bank, as applicable. SC, ST, PWD & Departmental candidates are exempted from payment of application fee.
- Candidates are required to make application fee payment through debit card/credit card/net-banking. The candidates will be automatically redirected to make online payment (wherever fee is applicable), once the form is successfully completed.
- No other mode of payment will be accepted. Application fee once paid will not be refunded under any circumstances. Candidates are therefore requested to verify their eligibility before payment of application fee.

SELECTION PROCEDURE

The selection criteria will be by way of Personal Interview only to be held at New Delhi only. The Selection criteria may change depending on the response received against the said post. Decision of NBCC will be final in this regard.

Selected Candidates will be entitled for remuneration consisting of Basic Pay, DA (on IDA pattern), HRA, Perks & Allowances under Cafeteria Approach, & Performance Related Pay (PRP). In addition to this CPF, Medical facility for self and dependents, Gratuity, Leave encashment is paid as per the rules of the Company.

The names of shortlisted candidates will be displayed on www.nbccindia.in under the head "CAREER within Human Resources". Separate individual e-mails will be sent to the shortlisted candidates. After the final selection, the "Offer of Appointment" shall be issued to the selected candidates through e-mail. Selected candidates will be on probation for one year.

GENERAL INSTRUCTIONS:

- Candidate should read the complete advertisement carefully & ensure that he /she fulfills the eligibility criteria for the posts advertised in all respects.
- Candidates are advised to give specific, correct, full information. All original certificates/documents in support of information furnished in the application form are to be produced at the time of verification of documents, failing which the candidate will be disqualified. Candidature is liable to be rejected at any stage of recruitment process or after recruitment or joining, if any information provided by the candidate is found to be false or is not found in conformity with eligibility criteria mentioned in the advertisement.
- Persons with benchmark disabilities as mentioned above can also apply for the above post in accordance with government of India guidelines in force. Disability of applicants applying against the posts reserved for disabled persons should not be less than 40%.
- The upper age limit indicated is for unreserved category candidates. Age relaxation for SC/ST/OBC (NCL)/Persons with Disabilities (PWD) will be as per Government guidelines in this regard. SC/ST/OBC (NCL)/PWD candidates are required to upload scanned copy of their caste / disability certificate (as applicable) along with the application form. Age Relaxation for Ex-Serviceman will be service rendered in the Armed forces plus 03 years. Internal candidates (NBCC India Ltd) will be given age relaxation of five years provided they have at least three years of service left before superannuation. Candidates from reserved category such as SC/ST/OBC (NCL) can also apply against the unreserved posts. However, age relaxation will not be allowed to such category candidates against unreserved posts.
- In case of variation in name / surname / name spelling mentioned in the application with that in the respective certificates pertaining to education / professional qualification / caste / etc., the applicant shall be required to submit a certificate from SDM or equivalent to this effect along with the respective documents at the time of verification of documents, failing which the candidature shall be liable to be cancelled. In case of change of surname of female after her marriage, the candidate is required to furnish marriage certificate and notarized affidavit in this regard.
- Relaxation of standard in selection against reserved vacancies if sufficient number of reserved category persons is not available on the basis of laid down general standards, the general standards could be relaxed suitably to fill up the reserved posts.
- The cut-off date for determining the age limit shall be the closing date of submission of online application. The date of declaration of result / issuance of mark sheet shall be deemed to

Guidelines

ENGAGEMENT OF JUNIOR RESEARCH OFFICER/SENIOR RESEARCH OFFICERS

1. INTRODUCTION

1.1. The Government of India, Ministry of Home Affairs has approved for setting up of Investigation Research Cell and engagement of Junior Research Officers/ Senior Research Officers with the objective of research in Criminology at national level.

2. OBJECTIVE

2.1. The main objective of the Investigation Research Cell of NIA is to encourage and foster doctoral research work in scheduled offences, Investigation, prosecution, legal framework in Terror cases, digital forensics, etc. and related subjects having a bearing on NIA functioning.

3. TARGET GROUP ELIGIBILITY

3.1 Eligibility :

Designation	Eligibility Criteria			Whether the post is of Technical nature/IT expert
	Educational Qualification	Experience	Any other criteria	
Senior Research Officer	Ph. D or M. Phil from Social Science/Clinical Psychology/ Political Science/ Criminology	03 years' experience in academic/ research work in respective field.	To be selected by the committee constituted by the DG, NIA, for personal talk	Technical
Junior Research Officer	Post Graduate degree in Social Science/Statistics/ Psychology/ Criminology	01 years' experience in academic/ research work.	To be selected by the committee constituted by the DG, NIA, after personal talk	Technical

4. NATURE OF ASSISTANCE AVAILABLE UNDER THE PROGRAMME

4.1. The tenure of research/study work is initially for a period of one year (extendable) or till further order, whichever is earlier. During the period of engagement, the research/ study work of the research officers will be evaluated by the NIA authorities regularly. If the research/ study work is found satisfactory; his/her tenure will be considered for extension.

5. VALUE OF RESEARCH/ STUDY WORK:

5.1. Each Research Officer will be paid the following remunerations:

S. N.	Name of the post	No of posts	Monthly remuneration
1.	Senior Research Officer	2	1,00,000 per month (fixed)
2.	Junior Research Officer	1	40,000 per month (fixed)

5.2. A committee of NIA will go through the progress and evaluate the quality of the research/ study work done regularly. If the work is not found to be satisfactory, the engagement of research officer will be discontinued.

6. House Rent Allowance:

6.1 No accommodation and HRA will be provided by NIA. The remuneration mentioned above is inclusive of all.

7. Medical:

7.1. No separate/ fixed medical assistance is provided.

8. Leave:

8.1. During the period of engagement, 1½ days leave will be applicable for each completed month subject to approval of the competent authority. Non-availing of such leave will not entitle for encashment of leave. No other kind of leave will be admissible.

9. PROCEDURE FOR APPLICATION

9.1. The candidates have to apply against the advertisements given by NIA.

10. PROCEDURE OF SELECTION BY THE NIA

10.1. The selection in each category will be made through 'Personal talk'. The interview will be organised by NIA through a Committee of Officers to be constituted with the approval of the Director General, NIA.

10.2. The payment to research officers will be made with effect from the date of joining only.

11. CONDITIONS OF ASSIGNING OF THE RESEARCH/STUDY WORK

11.1. Research officer shall not directly or indirectly carry on any trade, business or accept/ hold any appointment paid or otherwise during the period of engagement.

11.2. Research officers shall be required to submit comprehensive progress reports on the research/study work done to the NIA authorities regularly. The research may be discontinued at any time if the Research Officer fails to submit progress of research/study work at regular interval as stipulated to NIA authorities or if progress of the research officer is considered unsatisfactory by NIA.

11.3. If Research Officers discontinues the study/ research/ study work or is absent without permission for a long time before the completion of the assigned task/ period, it should be intimated to NIA authorities immediately.

12. CANCELLATION OF THE RESEARCH WORK

12.1. The services of research officer may be terminated at any time during the tenure and the decision of NIA will be final and binding.

12.2. The research officer is further liable for cancellation and full recovery of the remuneration paid to him till date in case of -

- Misconduct as deemed so by NIA, or
- Unsatisfactory progress of study/research work, or
- If the research officer is found to be ineligible on any ground after the award of the research work.
- Resignation/ termination on any ground.
- Breach of non-disclosure clause.

TACKLING JOINT ENTRANCE EXAMINATION MAIN ...

Key difference between JEE-Main and JEE Advanced

JEE Main	JEE Advanced
JEE Main exam is for admission in NITs, IIITs and other Central/State Government institutes.	JEE Advanced is for admission in IITs, IIST, RGIPT.
JEE Main exam is held 2 times in a year.	JEE Advanced is held only once a year.
JEE Main is conducted by NTA (National Testing Agency).	JEE Advanced is conducted by the IIT JAB examination body.
A candidate can appear for JEE Main for maximum 3 years.	A candidate can appear for JEE Advanced for a maximum of 2 years.
The JEE Main paper is of 3 hours.	JEE Advanced Paper is of 6 hours (Paper 1 —3 hours, Paper 2 — 3 hours).
JEE Main consists of 90 questions (only 75 need to be answered) of 4 marks each.	The number of questions and marks distribution is not fixed in the JEE Advanced exam.
The JEE Main question paper is in English, Hindi, Gujarati, Assamese, Bengali, Kannada, Malayalam, Marathi, Odia, Punjabi, Tamil, Telugu and Urdu.	The JEE Advanced question paper is in English and Hindi only.

JEE-MAIN

Papers: The JEE -Main comprises two papers. Paper 1 is conducted for admission to Undergraduate Engineering Programs (B.E/B. Tech) at NITs, IIITs, other Centrally Funded Technical Institutions (CFTIs), Institutions/Universities funded/recognized by participating State Governments. It is also an eligibility test for JEE (Advanced), which is conducted for admission to IITs. Paper 2 is conducted for admission to B. Architecture and B. Planning courses.

Eligibility

Based on the following parameters the candidates will be eligible for JEE Main.

- **Nationality:** Candidates must be a citizen of India. Foreign nationals as well as NRIs, PIOs, OCIs can also apply.
- **Age Criteria:** For appearing in JEE Main, there is no age limit for the candidates.
- **Total Attempts:** Students can avail a maximum of three consecutive attempts for JEE Main. The first attempt is taken soon after 12th board exams followed by the other attempts in consecutive years. The exam will be held 2 times in a year so the total attempts a candidate can appear for are 6.

Qualifying Exam

- The final examination of the 10+2 system, conducted by any recognized Central/State Board, such as Central Board of Secondary Education, New Delhi; Council for the Indian School Certificate Examinations, New Delhi; etc.
- Intermediate or two-year Pre-University examination conducted by a recognized Board/ University.
- Final examination of the two-year course of the Joint Services Wing of the National Defense Academy
- Senior Secondary School Examination conducted by the National Institute of Open Schooling with a minimum of five subjects.
- Any Public School/ Board/ University examination in India or any foreign country recognized as equivalent to the 10+2 system by the Association of Indian Universities (AIU).
- Higher Secondary Certificate Vocational Examination.
- A Diploma recognized by AICTE or a State board of technical education of at least 3 years duration.
- General Certificate Education (GCE) examination (London/Cambridge/Sri Lanka) at the Advanced (A) level.
- High School Certificate Examination of the Cambridge University or International Baccalaureate Diploma of the International Baccalaureate Office, Geneva.
- It is mandatory for all students appearing for JEE Main that they must have pursued at least 5 subjects with Physics and Maths as their core subjects in their qualifying examinations. Students who have studied less than 5 subjects in their qualifying exam are not eligible for JEE Main. Physics, Mathematics, Chemistry, Language and one more subject of choice is required as eligibility for JEE Main.
- I.e.,For B.E/ B.Tech, the subjects included are language, Physics, Mathematics, Chemistry / Biology / Biotechnology / Technical Vocational Subject, and any other subject. For B.Arch / B. Planning the subjects included are Language, Physics, Mathematics (mandatory), Chemistry / Biology / Biotechnology / Technical Vocational Subject, and any other subject.

Year of Passing the Qualifying Exam

- Students who have passed their 12th class examination or other equivalent qualifying examination in 2020 or 2021 are eligible for appearing in JEE Main 2022. Students currently appearing for their Class 12 examination or other equivalent qualifying examination in 2022 are also eligible.
- Diploma Holders- If a candidate is a diploma holder, then he/she can apply in JEE Main exam. However, the rank and score obtained in the exam will not be considered for admission in NITs or CFTIs.

Marks Eligibility

- For the candidates belonging to the general category – students must have secured a minimum of 75% marks in their class 12th board exams or they must rank among the top 20 percentile in their qualifying examination for getting admissions in IITs, NITs, IIITs and other CFTIs.
- For candidates belonging to a reserved category, a minimum of 65% marks is required for getting admissions in different undergraduate courses offered at IITs, NITs, IIITs and other CFTIs.

JEE Main Eligibility for Repeaters

NTA has removed the age limit. Before, candidates had to be less than the age of 24 years.

- The candidate must have passed the 12th class exam or any other equivalent exam in 2019 or 2020.
- Candidates should have secured at least 75% marks in class 12th board exam.
- Candidates must have 5 subjects in the qualifying exam with Physics and Mathematics as mandatory subjects.

Latest Changes in JEE-Main

This year, NTA has introduced negative marking for section B also. Earlier, there was no negative marking in numerical type questions.

NTA has increased JEE Main 2022 exam centres to 501 cities in India and 13 centres abroad. Applicants will be allowed to choose 4 exam centres while filling the application form of JEE Main 2022.

JEE ADVANCED

JEE Advanced (formerly known as IIT JEE) is the second phase of the JEE examination and is usually conducted after the JEE Main exam. It is an important test for engineering aspirants (especially for those who are seeking admission in premier engineering institutes

such as IITs). JEE Advanced is a computer-based exam and is usually conducted by seven different Indian IITs (IIT Kharagpur, IIT Bombay, IIT Roorkee, IIT Madras, IIT Kanpur, IIT Delhi and IIT Guwahati) on a rotational basis.

The entrance exam consists of two papers – Paper 1 and Paper 2. It is also carried out in two stages (or 'shifts') that are held on the same day. It is mandatory for all the students to appear for both papers in order to be eligible for the merit list. Candidates are granted admissions to various undergraduate courses as well as master's and dual degree programs offered by IITs based on marks scored or ranks secured in the JEE Advanced examination.

JEE-Advanced Eligibility

Nationality: Students who are citizen of India, PIO (Person of Indian Origin), OCI (Overseas Citizen of India) and foreign nationals are eligible to appear for JEE Advanced exam.

Age Criteria: Candidates who are born on or after the 1st of October 1997 are eligible. For applicants belonging to the reserved category, provided with a relaxation of 5 years. So, candidates should have been born on or after October 1, 1992.

Total Number of Attempts: Candidates can appear and write the exam twice for 2 consecutive years irrespective of whether or not he/she passed the qualifying exam.

JEE Advanced Eligibility on the Basis of Performance in JEE Mains

To be eligible for JEE Advanced, aspirants should rank within the top 2,50,000 (including all categories) successful candidates in JEE Main. The total number of candidates may also be greater than 2,50,000 in the presence of "tied" ranks/scores in any category.

- The applicants should have cleared class 12th board exams or any other equivalent exam in 2021. Applicants appearing for the 2022 board exams are also eligible. Candidates who had appeared in Class XII (or equivalent) examination, for the first time in 2020 or earlier, are NOT eligible to appear in JEE Advanced 2022.
- Students are eligible to appear for JEE Advanced if the results of their class 12th board exams or any other equivalent examination for the academic year 2021 were declared after June 2021.
- However, if the examination Board of Class XII (or equivalent) declared the results for the academic year 2019-20 on or after October 15, 2020, then the candidates of that board who appeared for their Class XII exam in 2020 are also eligible to appear in JEE (Advanced) 2022, provided they meet all the other eligibility criteria. In case the examination Board of Class XII (or equivalent) declared the results for the academic year 2019- 20 before October 15, 2020, but the result of a particular candidate was withheld, then the candidate will not be eligible to appear in JEE (Advanced) 2022.
- The students belonging to the general category must secure a minimum of 75% of marks and students belonging to SC, ST, PWD categories must secure a minimum of 65% of marks in their class 12th board examinations or they must be from the list of categories wise top 20 percentile in their respective class 12th equivalent board examinations.

TIPS

● Know the syllabus for JEE Main Exam

Familiarise yourself with the syllabus carefully as it plays a vital role in letting you know the important topics that carry maximum weightage. Once you are familiar with the syllabus, it will become much easier for you to understand how to prepare for JEE Main exam and plan your preparations further.

● Make a realistic timetable and follow it rigorously

The first step to success is a well-structured plan. Creating a realistic timetable will help you decide when and how much you should study in a day. Once you are done with preparing your timetable, make sure to stick to it. Divide the syllabus into equal sections and then prioritise the important topics. Besides, remember that studying in stretch can bring exhaustion. Hence, always take short breaks to refresh your mind.

NCERT is a must

While choosing the study material to prepare for the JEE Main exam, always start with the NCERT books as these include all the essential concepts and formulas. Not only this, 60-70% of the questions in JEE Main exam are based on NCERT books. Learning NCERT books first will help you build a solid foundation of the theories and concepts.

● Be aware of the exam pattern

Frequent alterations are made in the exam pattern by the NTA, including this academic year. Hence, it is essential to have knowledge of the changes and prepare accordingly.

● Learn to manage your time effectively

While preparing for any competitive examination, you must maintain a balance between studies and other things. No matter how much effort you put in to prepare for the JEE exam, if you don't know how to utilise your time effectively and wisely, you will never be able to complete your syllabus on time.

● Solve previous year papers and mock tests

Solving previous exam papers enhances your speed and accuracy to solve time-consuming questions. Besides, such test papers provide you with insights on what types of questions that might come in the exam, the difficulty level of those questions, and will boost your confidence.

Never hesitate to ask questions from your teachers or peers whenever you feel stuck at solving a problem and get your doubts cleared then and there. If you find anything complicated, ask again and again. Asking questions will help you widen your knowledge and solve similar complex problems.

Whenever you feel that you've come across a slump, never feel discouraged, instead, try to face the problem with confidence. Keeping yourself positive will not only help you in your JEE Main and JEE Advanced preparation but will also boost your confidence level.

These preparation strategies would help you prepare for the exam and clear it with flying colours.Wishing you oceans of good luck for the upcoming exams. As long as you do your best, you have nothing to worry about.

India's Decarbonization Mission

Adoption of Electric Vehicles

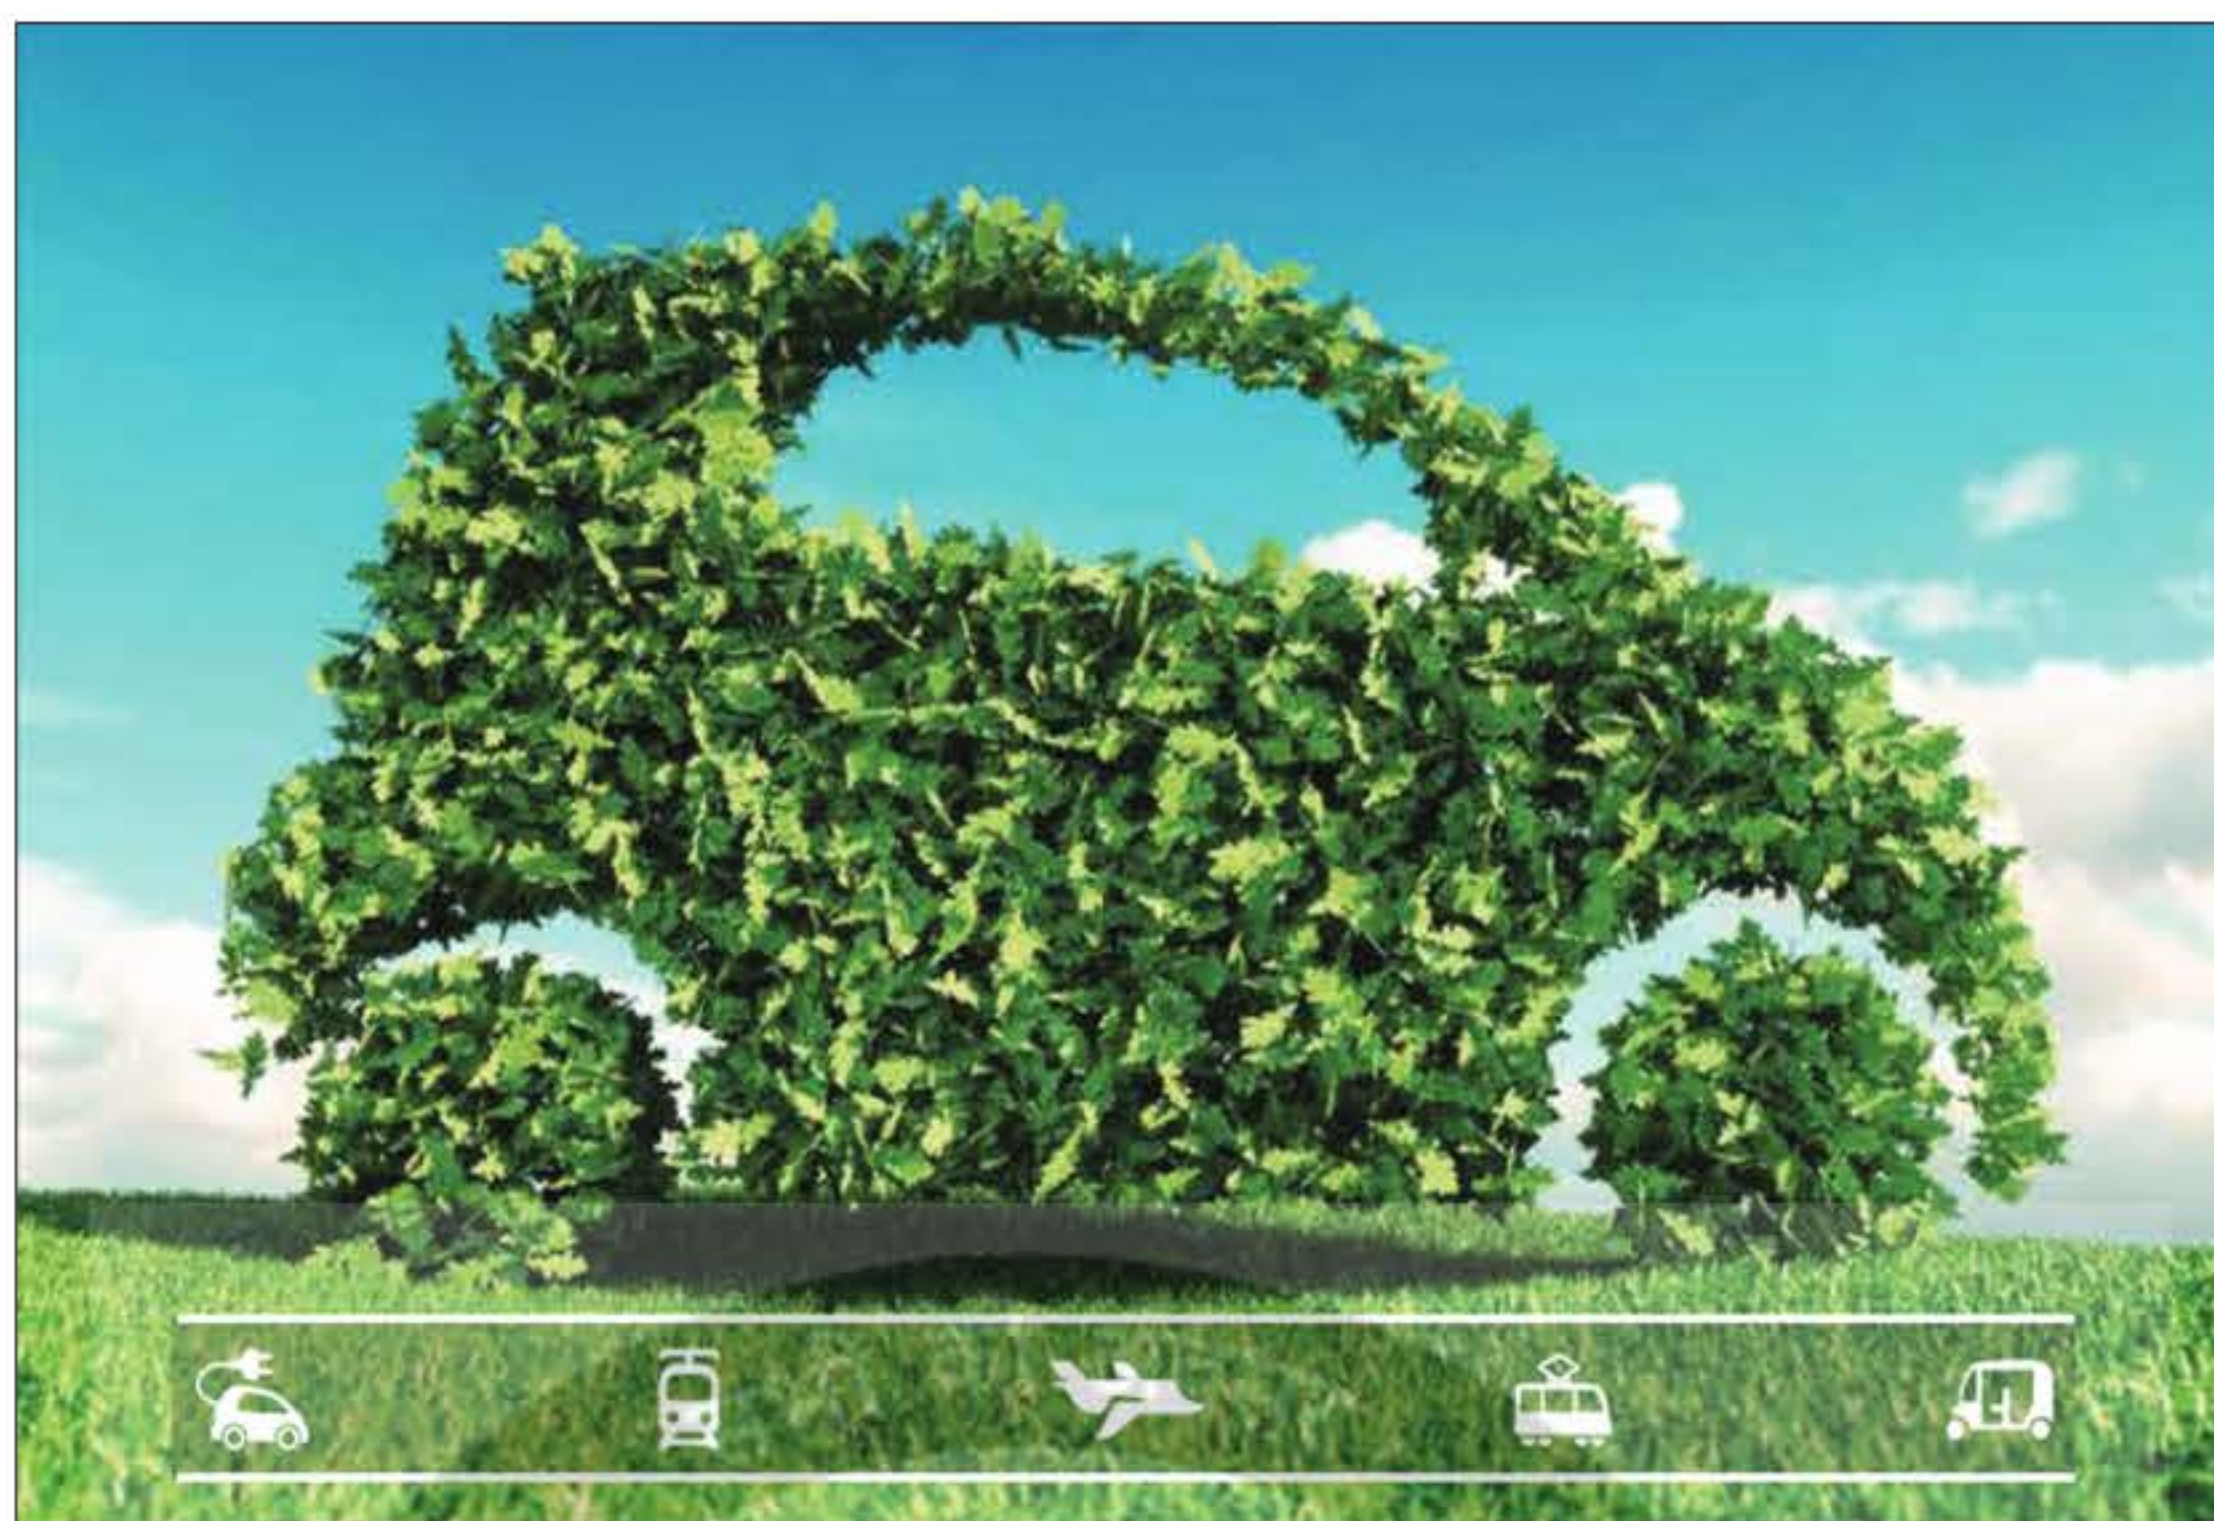

Darpan Mago

Despite being a developing nation, India's efforts towards sustainable development largely hinges on freeing the economy from carbon emissions. Be it the target of achieving 50% power production from renewable sources by the year 2030, introducing the National Hydrogen Mission, or initiating innovative Carbon Financing models as incentives, India is committed to decarbonising itself. One of the biggest initiatives that have become a matter of the moment is the recent effort toward transitioning to electric vehicles.

From a global standpoint, the transportation sector alone is responsible for about 37% of carbon dioxide emissions. Interestingly, now the reliance on fossil fuels for transportation is being weaned away with the rapid adoption of electric vehicles throughout the world. The biggest shift that has recently been ushering a new spirit in this space is making electric vehicles cheaper and more convenient to adopt. While electric vehicles are not new, the Indian Government's thrust on their adoption is futuristic.

Need for Transitioning to Electric Vehicles

The transport sector in our country is huge, and India has established itself as the sixth-largest manufacturer of vehicles globally. This sector is paramount to aiding the infrastructure and logistics of the entire nation. Being one of the biggest employers today, the transport sector contributes a total of 22% to the manufacturing GDP of the economy. With such

brilliant statistics, we cannot ignore this sector but need to devise methods to make it environmentally sustainable. The Indian automobile industry is growing rapidly, with demand for passenger vehicles, commercial vehicles and two-wheelers set to rise exponentially in the coming years.

As per the International Energy Agency's (IEA) report, the transportation sector is the second-highest contributor to carbon dioxide emissions globally. With India's growing energy demand, the dependence on fossil fuel is set to rise and be more problematic for the environment in the coming years. The transportation sector is gigantic, and to prevent the dependency on fossil fuels

from going up any further, there is a pressing requirement to transition to a greener future with sustainable electric mobility. This switch to electric vehicles becomes even more pressing when we learn that India is home to 22 of the world's 30 most polluted cities. With these numbers, there is an immediate need to construct a methodology to facilitate the usage of immediate alternatives to fossil fuels.

Government Departments Leading the Way

Owing to the high prices of batteries, primarily because of the metal and compounds used in them, electric vehicles are more expensive compared to internal combustion engine vehicles. At present, in the Indian market, an electric vehicle costs

almost double the price of an internal combustion engine vehicle.

Considering this factor, the Government of India came up with an innovative idea to accelerate the adoption of electric vehicles. The plan was to popularise these electric vehicles in Government departments first, which have the financial capability and capacity to bear even higher initial outlays. With this method, the Government will not only be the first changemaker but will also surge the demand for electric vehicles in the Indian market, leading to a slight reduction in their overall costs. This soaring demand from the Government compounded over months and years would lead to a huge reduction in costs, enough to make the vehicles more affordable for common folks in time to come.

To execute this idea, Energy Efficiency Services Limited (EESL), a power sector Joint Venture company under the administrative control of the Ministry of Power began India's first-ever project of leasing out electric vehicles to Government organizations. EESL works in the energy services space. It is a unique company, which in the past has bulk purchased energy-efficient products like bulbs, fans, tubelights, streetlights and smart meters to get the benefit of the volume discount through this procurement method. While they aggregate the demand for energy-efficient products, the benefit of price reduction is passed on to the end consumers. As this company has already worked on similar procurement methods of scalability and demand aggregation, a corresponding method was mapped for electric vehicles as well. They put out tenders for the procurement of electric vehicles from private manufacturers in big volume and began leasing them out with full maintenance services, along with chauffeurs, to Government departments. Not only did the bidding process and bulk

procurement lead to the discovery of cheaper cost of one car, but also credited the Government departments as one of the first changemakers. This way, the Government was the first customer of electric vehicles and was able to propel its demand without entirely burdening the private owners and the general buyers. The onus of transitioning to an expensive electric vehicle fleet was well shared by the Government. EESL launched its electric vehicles project throughout India on March 7, 2018. The project was inaugurated by the then Honourable Minister of Power. Leasing a Maruti Swift Dzire for 3 years in Delhi costs nearly Rs. 40,000 a month, and EESL's electric vehicles can be hired at almost the same expense, for a lease period of 6 years, with a well-mannered chauffeur and full vehicle maintenance contract.

As on November 16, 2021, electric vehicles deployed by EESL completed 6 crore green kilometres on roads and reduced about 12,076 tonnes of carbon dioxide emissions. Further, to this date, over 1,700 electric vehicles are running on the roads attached with different Government entities all over India. With this big number, it is projected that about 4.51 million litres of fuel has already been saved in addition to monetary savings of INR 383 million in fuel. To supplement these numbers, it is also projected that these cars are leading to about 1,690 kilograms of reduction in particulate matter emissions. EESL has brought out all the numbers and statistics on a real-time dashboard available online with the following web address:

<http://ev.convergence.co.in/#/>.

When the scheme began to pull off, it was understood that a simple push and introduction of electric vehicles was not enough as the next roadblock was the driver's range anxiety. This means that electric vehicles had less range (or mileage) as compared to internal combustion engine cars. To solve this problem, EESL began to enhance the charging infrastructure wherein to date it has installed about 396 charging stations across the country. With such a step, and already strengthening the infrastructure of electric vehicle charging stations, the problem of charging and range anxiety has receded. Nevertheless, many innovative solutions in terms of improving battery storage are still needed to fully solve the problem of range anxiety amongst electric vehicle drivers, and make these as feasible as internal combustion engine vehicles.

INDIA'S DECARBONIZATION MISSION

National Electric Mobility Mission Plan 2020, wherein it has instituted a scheme titled - Faster Adoption and Manufacturing of Hybrid and Electric Vehicle (FAME), which aims to widely increase the usage of electric vehicles on roads.

Under this scheme, a subsidy is being provided on the purchase of electric vehicles. The current rate of subsidy for different category of vehicles is as under:

- **Two wheelers:** Rs 15000/- per kWh upto 40% of the cost of Vehicles
- **Three wheelers:** Rs 10000/- per kWh
- **Four wheelers:** Rs 10000/- per kWh
- **E Buses:** Rs 20000/- per kWh
- **E Trucks:** Rs 20000/- per kWh

This scheme supports the ambition of making electric vehicles more affordable for the common people by reducing their overall price through subsidy mechanisms. Under this scheme, an outlay of Rs. 10,000 crore has been set aside by the Government of India for subsidy disbursement for 3 years starting from April 1, 2019. The process of subsidy is simple and hassle-free, wherein the manufacturers are authorised to directly claim the subsidy from the Government when they complete the sale of an electric vehicle to a consumer. For subsidy, the consumers do not need to claim anything, but the manufacturer will simply pass on the subsidy benefit to the consumer first and then claim

the subsidy from the Government directly after concluding their sale.

There are multiple models under the two-wheeler, four-wheeler and three-wheeler categories available under the FAME part-2 scheme, wherein various manufacturers from around the country have registered themselves. The FAME scheme is divided into two parts, namely FAME part 1 and FAME part 2, in the first part about 2,80,987 hybrid and electric vehicles were subsidised through the scheme. Further to this, under the National Electric Mobility Mission Plan 2020, the Department of Heavy Industries sanctioned 425 electric and hybrid buses in various Indian cities at a cost of about Rs. 280 crores. It is interesting to note that, Phase-2 of the FAME scheme focuses on supporting the electrification of public transportation by subsidising approximately 7,000 electric buses, 5 lakh electric three-wheelers, 55,000 electric four-wheeler cars and 10 lakh electric two-wheelers. These efforts by the Government are ambitious to reduce the overall carbon footprint in India.

Private Cabs Going the Electric Way

The private sector has become another torchbearer of this initiative by actualising the use of electric vehicles and pushing their sale in the market. We have already gained a plethora of electric vehicles manufacturers in India, however, their marketing and practical on-

road usage are being flourished only because of private cab aggregators. For instance, we witnessed the growth of cab aggregators like Blu Smart Mobility in the year 2019, who are providing cab services in Delhi NCR and Mumbai through a big fleet of electric vehicles.

then providing taxi services to the general public. The Blu Smart Mobility's fleet has vehicles from manufacturers like Tata, Mahindra and Hyundai Motors. The initial range of Mahindra e-Verito cars in their fleet was 140 kilometres, but the newer variant offers 181

is priced at Rs.85,099 in Delhi, while the Ola S1 Pro is priced at Rs.1,10,149. Another international taxi aggregator, Uber has tied up with start-ups like Lithium to introduce 1,000 electric vehicles in metro cities of India.

Impact of Electric Vehicles on Employment

The European Climate Foundation has estimated that through reducing oil demand by more efficient electric cars, global employment will increase by 5,00,000 to 8,50,000 by 2030. Another report estimates that about 2 million additional jobs will be created by EVs by 2050. Further, as imported oil is replaced by electricity and batteries, large employment is possible in enhancing power-generation and distribution, and in battery manufacturing, including battery-recycling. As far as the automotive sector is concerned, a large part of the supply chain will get transformed in the power train segment. Traditional suppliers will move from supplying parts such as exhaust pipes and ICEs to perhaps battery materials, electric motors, and regenerative braking systems. EVs will create opportunities in durable and lightweight thermoplastics, higher demand for electricity, storage and many others. In addition, EV battery charging and swapping would create a large number of jobs throughout the country. (Reference NITI Ayog)

Future of Electric Mobility in India

The future of electric mobility is bright and India is focused on its prime environmental agenda to reduce its dependence on fossil fuels. With electric car manufacturers already flooding the market with new models, it is but time that the prices of electric vehicles will soon become equal to internal combustion engine vehicles. A roadblock that remains is the charging time and range anxiety, wherein the time taken to charge the car battery has to be the same as the time taken by a car at the fuel station. With newer battery technologies coming each day and the advent of fast chargers, we will gradually see the range anxiety fade and charging time also being reduced significantly. India is clear with its decarbonization goals and is surely doing enough to reduce the overall carbon emission through the electric vehicles project.

(The author is Assistant Manager (Public Relations), Energy Efficiency Services Limited, a Joint-Venture Company under the Ministry of Power, Government of India. He can be reached at darpanmago@gmail.com).

Views expressed are personal.

Union Minister of Road Transportation and Highways Shri Nitin Gadkari recently inaugurated the first pilot project for hydrogen-powered Fuel Cell Electric Vehicle (FCEV), which runs on hydrogen and emits nothing but water vapour. This car uses electricity to power its motors and hydrogen as fuel. It stores some electricity in its battery pack as well. To take it further, the Minister recently used the hydrogen-powered car and arrived at the Parliament House in his FCEV Toyota Mirai. This indicates India's eagerness to make a shift to sustainable vehicles for the decarbonization of the economy. It is also pertinent to note that the Minister had also tweeted that India can soon become a hydrogen exporting country.

They have a fleet strength of about 300 electric vehicles with over 200 driver-partners, who run their operations in these cities. Blu Smart's business model involves the leasing of all its electric vehicles from Energy Efficiency Services Limited and

kilometres, similarly, the newer variants of Tata e-Tigers and Hyundai Kona offer a range of 213 kilometres and 452 kilometres respectively, which are part of their present fleet. Blu Smart also offers electric charging stations in the city in collaboration with Exicom Power Solutions. Another such cab service provider working in Delhi NCR is Prakriti E-Mobility Solutions Private Limited. They provide electric cabs in Delhi under the banner of EVera with professional drivers, who are engaged by the cab company through a third-party fleet management agency. They have a fleet strength of about 250 cars, and as of now, operate only in the Delhi and NCR region. The cars in EVera include Tata Tigers, which are owned by the company itself. Their sales pitch is based on the premise that they provide comfortable cabs with qualified drivers without compromising on the customer experience. This is possible because they own the cars themselves. Additionally, another reputed cab aggregator like Ola has expanded and entered an altogether different domain of manufacturing electric vehicles instead of electrifying their fleet. They have introduced their smart and sleek electric two-wheelers in the market. Currently, they are offering two variants Ola S1 and Ola S1 Pro with a range of 121 kilometres and a true range of 135 kilometres respectively. As on date, the Ola S1 two-wheeler

Pariksha Pe Charcha 2022

Pariksha Ki Baat PM Ke Saath

In the 5th edition of Pariksha Pe Charcha (PPC) held on 1st April 2022, the Prime Minister Shri Narendra Modi interacted with students, teachers and parents at Talkatora Stadium, New Delhi. Union Ministers Shri Dharmendra Pradhan, Smt. Annpurna Devi, Dr. Subhas Sarkar, Dr. Rajkumar Ranjan Singh and Shri Rajeev Chandrasekhar were present on the occasion. The programme also saw virtual participation of Governors and Chief Ministers, teachers, students and parents.

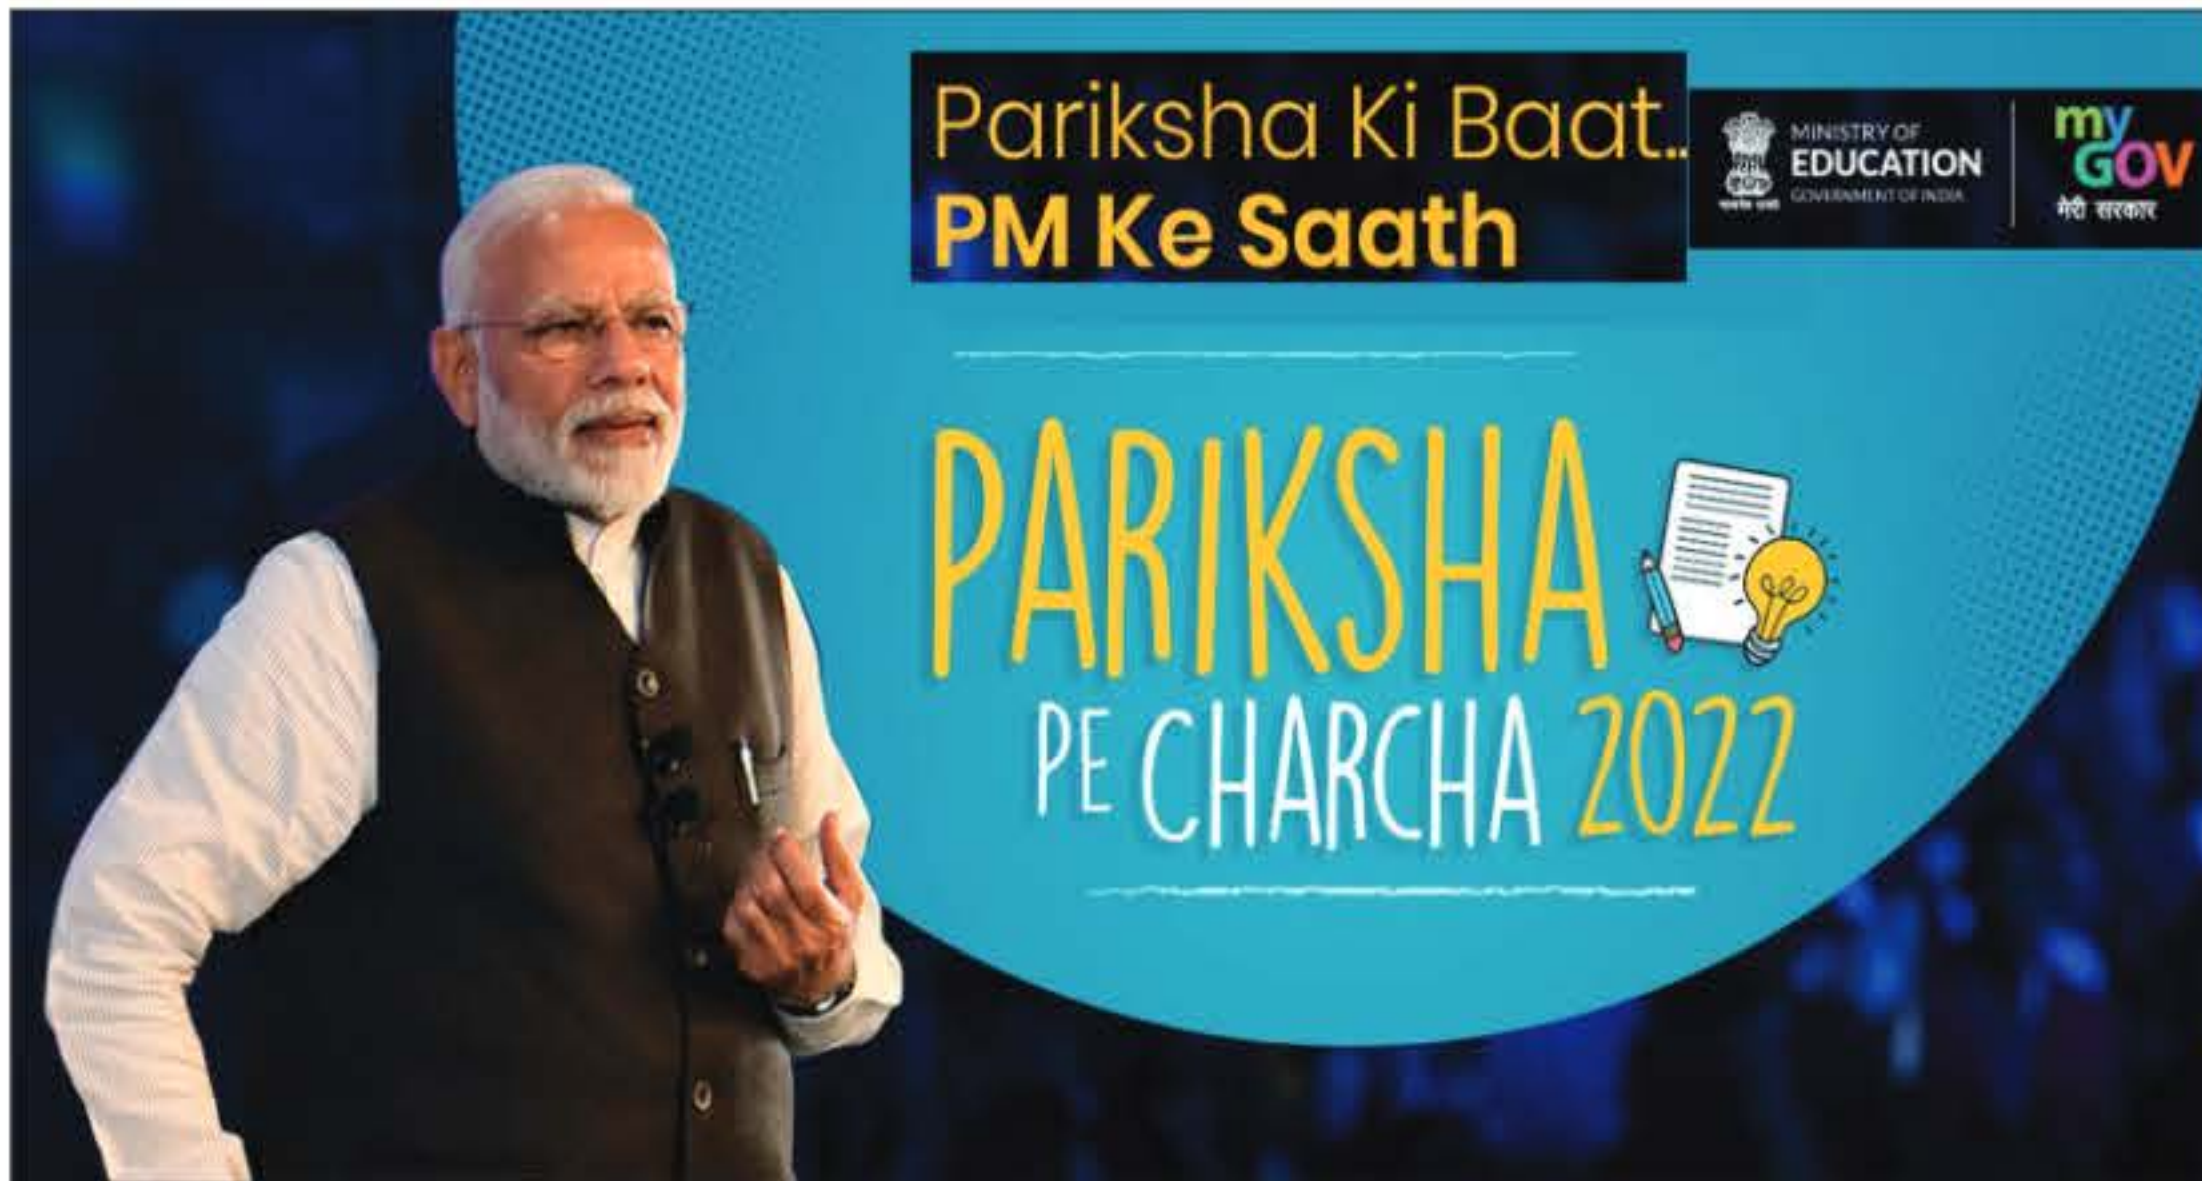

• The Prime Minister introduced a new practice in the 5th edition of PPC. He said that questions that could not be taken by him will be addressed through video, audio or text message on the Namu App.

• Answering questions by students about the tensions and stress pertaining to examinations, the PM told them "In a way you are exam-proof." The experience they got from previous examinations would help them overcome the upcoming examinations. He said that some portion of the study might be missed but asked them not to be stressed over that. He suggested that they should focus on the strength of their preparation and stay relaxed and natural in their day to day routine. There is no point in trying anything as imitation of others but stay with their routine and work in a festive relaxed manner.

• On the question of online mode of study and many online distractions like YouTube, etc. the PM said that the problem is not with the online or offline modes of study. Even in the offline mode of study, the mind could be very distracted. "It is not the medium but the mind that is the problem", he said. He said the technology would evolve and the students should embrace the new technologies in education. New modes of learning should be taken as an opportunity, not as a challenge. Online can augment your offline learning.

• Clarifying that the NEP is 'National' Education Policy and not a 'New' Education Policy, the PM said the policy was drafted after a lot of brainstorming with various stakeholders. "Consultation for National Education Policy has been exhaustive. People across India were consulted on this... This policy was made not by the Government but by the citizens, the students, and its teachers for the development of the country."

• The PM remarked that the 20th century education system and ideas cannot determine our development trajectory in the 21st century. He said that we would be left out and go back if we don't evolve with the changing systems. He said that National Education Policy gives the opportunity to follow one's

passion. He stressed the importance of skill along with knowledge. He said that's the reason to include skills as part of the National Education Policy.

• The PM also underlined the flexibility provided by NEP in the choice of subjects. He said proper implementation of NEP will open new venues.

• The PM urged schools all over the country to find new ways to implement the new technologies invented by the students.

• The PM asked the parents and teachers not to force their dreams on the students. "Unfulfilled dreams of teachers and parents cannot be forced on students. It is important for every child to follow their own dreams" said the Prime Minister. He urged the parents and teachers to accept that every student has some special ability and to discover that.

• When asked by students and parents on how to maintain the motivation to study in times of uncertainty, the PM said, "There is no injection or formula for motivation. Instead, discover yourself better and find out what makes you happy and work on that." He advised the students to observe the surrounding how children, divyans and nature try to achieve their goals. "We should observe the efforts and strengths of our surroundings and draw inspiration from them", he said. He also recalled from his book Exam Warrior how one can feel motivated by writing a letter to the 'exam' itself and challenging the exam with one's strength and preparation.

• The PM said if things are learnt with full attention nothing will be forgotten. He asked the student to be fully present in the present. This mindfulness about the present will help them to learn and remember better. He asked them to treasure the power of memory and keep expanding it. He also said a stable mind is best suited for recalling things.

• The PM also advised students that the habit of analyzing the output and outcome is an important part of education. He said, "Often we devote more time to subjects that are easy and of interest to us. This

HIGHLIGHTS

requires deliberate effort to overcome the 'cheating of mind, heart and body.' Do things that you enjoy and that are when you will get the maximum outcome."

• On being asked by students how they should handle the demands of competitive exams, the PM said, if one studies the syllabus with a full mind, different exams don't matter. He said one should aim to master the subject rather than for clearing exams. He further said athletes train for sports and not for competition. "You belong to a special generation. Yes, there is more competition but there are more opportunities too", he added. He asked the students to treat competition as the greatest gift of their time.

• When a parent asked how society can contribute towards the upliftment of rural girls, Shri Modi said that the situation has changed a lot over the years

from the time when education of girls was ignored. He stressed that no society can improve without ensuring proper education of the girls. He said that the opportunities and empowerment of daughters should be institutionalized. Girls are becoming a more valued asset and this change is welcome. He said in the year of Azadi Ka Amrit Mahotsav, India has the maximum number of women Members of Parliament in the history of independent India. "Daughter is the strength of the family. What can be better than seeing our Nari shakti excel in different sectors of life."

• On being asked how students can contribute to keeping the environment clean, the PM thanked the students and credited them for making this country clean and green. "Children defied the naysayers and truly understood the pledge of 'Swachata,' he observed.

Stressing the importance of the 'P3 Movement' - Pro Planet People and LifeStyle for the Environment - LIFE, the PM remarked, "We will have to get away from the use-and-throw culture and move towards a lifestyle of circular economy."

• The Prime Minister underlined the importance of the Amrit Kaal which coincides with the best years of the students in the development of the country. He also stressed the importance of fulfilling one's duty. He praised the students for doing their duty in getting vaccinated.

• Lauding the skills and confidence of the students who conducted the Pariksha Pe Charcha 2022, the PM reiterated the need to develop the capability to appreciate qualities in others and learn from them. "We should have a tendency to learn instead of jealousy. This capability is important for success in life," he said.

• The PM concluded on a personal note by acknowledging the importance of PPC for him. He said that he feels 50 years younger when he is interacting with young students. "I try to learn from you by associating with your generation. As I connect with you I get the glimpse of your aspirations and dreams and try to mould my life accordingly. Therefore this programme is helping me grow. I thank you all for giving me time to help myself and grow", concluded a visibly elated Prime Minister.

APOORVA MAINGI
HARYANA

Government of India is organising a series of events to mark Azadi Ka Amrit Mahotsav under the overall spirit of Jan Bhagidari and Jan Andolan. The event I have started enjoying of late is 'Azadi Ka Safar -Akashvani Ke Saath'. I've been following this series since it was first broadcasted by Akashvani (All India Radio). The aim of this programme is to raise public awareness about India's freedom movement, hardships our freedom fighters went through, our country's glorious history and heritage. Young generation like us know a little about our freedom fighters and their sacrifices. Listening to this series everyday has not only increased my knowledge but has also filled my soul with great pride and patriotism for being the citizen of a country with such a glorious freedom struggle. The cherry on top of all of this is the Amrit Mahotsav Quiz organised

by the News Services Division of the All India Radio. Every Monday and Tuesday, one question each in English and Hindi is asked at the start of the morning bulletins. One lucky participant is declared the winner of that edition of the quiz. I have been sending answer of the quiz to them but I have not been lucky so far. But I don't regret it because participation matters. I am trying to participate and gain as much benefit as I can, from events conducted for celebrating Azadi ka Amrit Mahotsav and I urge to all the readers to contribute their part to the Jan Utsav.

YUKTA SINGH, NEW DELHI

I got to know about the 'Azadi ka Amrit Mahotsav' when I was in Almora, Uttarakhand. There, I saw people of all ages cycling in colossal numbers down the mountainous road. Many other events were also organised but this cycle rally had a much deeper impact on me. I was mesmerised by the idea of cycle rally to make people witness the beauty of our country and at the same time giving the message of adopting an eco-friendly attitude. The campaign taught me to take pride in my country's past and strive to make its future brighter.

I also listened to the FM programme of All India Radio which was broadcast in the morning. The reader narrated the story of great but unsung revolutionary freedom fighters. I am very patriotic and therefore especially enjoyed this programme. I got to know about the unknown warriors who equally contributed to the freedom struggle of the country but didn't get the deserved recognition.

Budget Session Adjourned Sine Die; Both Houses Pass 11 Bills

The Budget Session of Parliament which commenced on 31st January 2022 was adjourned sine die on 7th April 2022. During the session, the Lok Sabha and the Rajya Sabha together passed 11 Bills.

Some of the major Bills passed by both Houses included the Criminal Procedure

(Identification) Bill, 2022, the Delhi Municipal Corporation (Amendment) Bill, 2022, the Constitution (Scheduled Tribes) Order (Amendment) Bill, 2022, the Constitution (Scheduled Castes and Scheduled Tribes) Orders (Amendment) Bill, 2022, the Weapons of Mass Destruction and their Delivery Systems (Prohibition of Unlawful Activities) Amendment Bill, 2022.

Import of Additional 101 Weapon Systems Banned to Boost Indigenization

Taking the *Atmanirbhar Bharat* mission ahead, India has announced the 3rd "negative arms import list" also called the "positive indigenisation list." The list includes 101 defence weapons and platforms that will be manufactured indigenously. Now the total number of weapons and systems on this list is 310. Defence Minister Rajnath Singh said, this list not only takes into account the capabilities of our domestic defence industry, but also it will be helpful in attracting new investments in technology and manufacturing capabilities, and promoting domestic research and development. Meanwhile, the Defence Research and Development Organization (DRDO) handed over 30 ToT (Transfer of Technology) agreements to 25 Indian industries for the transfer of 21 technologies developed by 16 DRDO labs across the country. So far DRDO has entered into more than 1430 ToT agreements with industries all over the country, out of which, a record number of 450 ToT have been signed in the last two years.

Yoga Utsav: Thousands Including Foreign Dignitaries Perform Yoga at Red Fort

On the occasion of the World Health Day on 7th April, the Ministry of Ayush organised a Yoga Utsav at Red Fort, kickstarting the 75 days countdown to the International Day of Yoga (IDY). The event saw active participation of many Union Ministers, Members of Parliament, Ambassadors of various countries, Yoga gurus, senior officials and volunteers as they performed Common Yoga Protocol (CYP).

CYP has been designed with inputs from experts with the intention to popularise practices like Yoga Nidra, Pranayama, Dhyan etc. Each Yogic activity is a key to improving flexibility, strength, balance and attaining harmony. The CYP can be accessed in the Government of India's Yoga Portal - <https://yoga.ayush.gov.in>.

I&B Minister Shri Anurag Singh Thakur Launches Broadcast Seva Portal

Union Minister of Information and Broadcasting Shri Anurag Singh Thakur launched the Broadcast Seva Portal in New Delhi on 4th April, heralding a new chapter in Ease of Doing Business in the broadcasting sector. Broadcast Seva Portal is an online portal solution for speedy filing and processing of applications of broadcasters for various kinds of licenses, permissions, registrations, etc. Speaking on the occasion, Shri Anurag Thakur said Government has harnessed technology to bring transparency in the system and make it more accountable. The Portal will provide a 360 degree solution to over 900 Satellite TV Channels, over 70 Teleport Operators, over 1750 Multi-Service Operators, over 350 Community Radio Stations (CRS), over 380 Private FM Channels and other broadcasters.

NCW Launches Anti-Human Trafficking Cell

The National Commission for Women has launched an Anti-Human Trafficking Cell to improve effectiveness in tackling cases of human trafficking. The Commission has observed that some of the major issues faced in combating trafficking include lack of rehabilitation for victims and insensitive attitude towards trafficked survivors and their families. Therefore, the Cell will improve monitoring mechanism and encourage government agencies regarding measures being adopted for prevention of trafficking and rehabilitation of victims. The Cell will also help survivors of trafficking in rebuilding their lives by providing them with need-based training and by organizing capacity building programs for them to prevent re-traumatization of victims.

INTERNATIONAL

India, Australia Ink Economic Cooperation and Trade Agreement

India and Australia have signed the Economic Cooperation and Trade Agreement (ECTA) on 2nd April 2022. The India-Australia ECTA is the first trade agreement of India with a developed country after more than a decade. The Agreement encompasses cooperation across the entire gamut of bilateral economic and commercial relations and covers areas like Trade in Goods, Rules of Origin, Trade in Services, Technical Barriers to Trade (TBT), Sanitary and Phytosanitary

Measures (SPS) measures, Dispute Settlement, Movement of Natural Persons, Telecom, Customs Procedures, Pharmaceutical products, and Cooperation in other Areas. Minister of Commerce and Industry Shri Piyush Goyal said that the India-Australia trade pact will raise bilateral trade from the present \$26-27 billion to \$100 billion by 2030, much faster than initial expectation of rising to \$50 billion in five years.

India Abstains from UNGA Voting to Oust Russia from UNHRC

The 193-member UN General Assembly at its emergency special session on the Russia-Ukraine conflict on 7th April voted to suspend Russia from the 47-member UN Human Rights Council (UNHRC). The US-led resolution was supported by 93 countries, opposed by 24 countries, with 58 abstentions (including India) and 19 countries failing to turn up to vote. This is the first time that a permanent member of the UNSC has been ousted from a UNHRC. Libya is the only other country to have been suspended from UNHRC in 2011. Russia's suspension was based on a 2006 resolution which allows suspension of membership rights of a country which commits "gross and systematic violations of human rights". India said its abstention was for "reasons of substance and process", and claimed that it chose the "side of peace". It expressed concern about the situation, and condemned the killing of civilians in Bucha while reiterating its call for an independent investigation into the killings.

ECONOMY

Agri Exports Cross Record USD 50 Billion Mark

Exports of agricultural products (including marine and plantation products) for the year 2021-22 have crossed USD 50 billion, highest level ever achieved for agriculture exports. The agricultural exports have grown by 19.92% during 2021-22 to touch \$50.21 billion. The growth rate is remarkable as it is over and above the growth of 17.66%, at \$41.87 billion, achieved in 2020-21 and has been achieved in spite of unprecedented logistical challenges in the form of high freight rates, container shortages etc. This achievement over past two years will go a long way in realising the Prime Minister's vision of improving farmers' income.

Futuristic Initiatives for Clean Energy Launched Under Mission Innovation

Union Minister of State for Science & Technology Dr Jitendra Singh launched the "Mission Integrated Bio-refineries" to accelerate clean energy solutions through Public - Private Partnership (PPP) on 4th April. The initiative fulfills India's commitment to a low-carbon future through the global initiative "Mission Innovation", centred on technology advancement and cooperation, zero waste bio-refinery for cost effective production of sustainable bio-fuels with co-production of bio-based chemicals and materials, using bio-technological interventions. The Ministry also launched three Integrated Clean Energy Material Acceleration Platforms to leverage emerging capabilities in next-generation computing, artificial intelligence (AI) and machine learning (ML), and robotics to accelerate the pace of materials discovery up to 10 times faster. The platforms constitute a knowledge network of more than 38 elite institutions and 80 research personnel working on next-generation low-cost advanced energy materials. The Ministry also announced the funding opportunity of Hydrogen Valley Platform, which is a global initiative to optimise the hydrogen demand and supply by onsite generation and utilization. DST has committed to facilitate the delivery of three clean hydrogen valleys in India by 2030. Mission Innovation has the potential to unlock affordable decarbonisation pathways for sectors responsible for 52% of current global emissions.

MISSION INNOVATION
accelerating the clean energy revolution

Fit India Quiz State Finalists Announced, Winners to Now Compete for National Title

36 winners of the Fit India Quiz State Rounds have been selected and will now represent their respective State and Union Territories in the upcoming national rounds. The state finals, which took place in the month of February and March, saw participation from the qualified 359 schools, as they competed to become their respective state champions. The state champions have been awarded a cash prize of Rs. 2.75 lakh each. The 36 school teams will now move to the national round that would take place in the National Capital Delhi and be telecast on Star Sports and webcast on multiple social media channels. The winners of the national quiz will win additional cash prizes for themselves and their school and also hold the honour of being called India's 1st Fit India Quiz Champion.

Sports Ministry to Spend Rs 190 Crores for Training of Athletes for CWG, Asian Games

The Union Ministry of Youth Affairs and Sports has finalised the Annual Calendar of Training & Competitions (ACTCs) for 33 Sports disciplines and earmarked a sum of Rs. 259 crores for the financial year 2022-23 as assistance to various National Sports Federations (NSFs). Of this, as much as Rs. 190 crores will be spent on athletes for their training, foreign exposure, equipment and support staff for Commonwealth Games 2022 and Asian Games 2022. Minister for Youth Affairs and Sports Shri Anurag Singh Thakur stated that the funds will not be a constraint for the preparations of the athletes and that the Ministry will provide all necessary help and support to the players and NSFs.
