**Special Issue: Advances in Modeling of Multi-functional Material/Structures**

**Guest Editors: Sundararajan Natarajan · Sushma Santapuri**

## CONTENTS

Preface to special issue: advances in modeling of multifunctional material/structure <i>S. Natarajan and S. Santapuri</i> .....	143
Numerical modeling of fracture propagation in orthotropic composite materials using an adaptive phase-field method <i>I. Jain, C. Annavarapu, S.S. Mulay and A. Rodríguez-Ferran</i> .....	144
Non-rectangular plates with irregular initial imperfection subjected to nonlinear static and dynamic loads <i>V. Keshav and S. Vummadisetti</i> .....	155
Fabrication and bandgaps of microscale metallic phononic crystals <i>V. Sharma and C. Chandraprakash</i> .....	159
Effect of different biomaterials on maximum contact stress in total hip arthroplasty <i>A. Mishra, I. Jain, S. Joshi and C.V. Chandrashekara</i> .....	167
Investigation on the Effect of Material Mismatch Between Two Dissimilar Materials Using an Adaptive Phase-field Method <i>S. Khan, C. Annavarapu and A. Rodríguez-Ferran</i> .....	173
Stress intensity factors of Brazilian disc rotating about diameter <i>S. Singh and K.N. Surendra</i> .....	187
Computational indentation in weakly cross-linked polymer networks <i>M.K. Maurya and M.K. Singh</i> .....	196
