

Contents continued from back cover

Super efficiency and sensitivity analysis of the Indian hotels and restaurants N. Sharma and S.K. Mogha	2131
Modelling medical oxygen supply chain network under demand uncertainty using stochastic programming R. Sawant, A. Kumar and V.K. Yadav	2158
Supplier selection and capacity allocation in medical tourism service supply chain S. Karadayi-Usta and S. Serdarasan	2191

Theoretical Articles

Artificial intelligent support model for multiple criteria decision in construction management P.V.H. Son and L.N.Q. Khoi	2218
Optimization techniques for crisp and fuzzy multi-objective static inventory model with Pareto front A. Sahoo and M. Panda	2242
Development of multi-period, multi-product model to mitigate supply risk with capacity constraint and discount S.A. Yavari, S.M.T. Fatemi Ghomi and F. Jolai	2285
Cost scrutiny of discrete-time priority queue with cluster arrival and Bernoulli feedback V. Shree, S. Upadhyaya and R. Kulshrestha	2312
New strategy for anti-loop formulations J.M. Garcia	2346
Effect of memory on an inventory model for deteriorating item: fractional calculus approach D.K. Jana, A.K. Das and S. Islam	2360
Learning the weights using attribute order information for multi-criteria decision making tasks J. Dombi and T. Jónás	2379
