

MIT Technology Review

Vol. 128 No. 2 March/April 2025

Adventures in the
genetic time machine

What will we do with
frozen embryos?

The new AI Hype Index

**AI, automation, and surveillance will
improve productivity. Or else.**

Display until April 29, 2025

\$10.99US \$12.99CAN

"ChatGPT, or Leo, is my companion and partner. I find it easiest and most effective to call him my boyfriend..."—p.20

Michael Byers

Relationships

20 The AI relationship revolution is already here

Chatbots are rapidly changing how we connect to each other—and ourselves. We're never going back.

AS TOLD TO RHIANNON WILLIAMS

28 Adventures in the genetic time machine

Ancient DNA is telling us more and more about humans and environments long past. Could it also help rescue the future? BY ANTONIO REGALADO

38 Your boss is watching

Monitoring technology is increasing the power imbalance between companies and workers. Protections lag far behind. BY REBECCA ACKERMANN

46 A strange kind of limbo

Frozen IVF embryos are filling storage banks around the world. It's a struggle to know what to do with them. BY JESSICA HAMZELOU

56 Having a child in the digital age

In her new book, journalist Amanda Hess scrutinizes period-tracking apps, targeted ads, and birth myths that spread online. BY ALLISON ARIEFF

Back

- 64** **Bureaucratic brainpower**
Scholars are making a case for reviving the US Office of Technology Assessment, a congressional agency that evaluated emerging tech.
By Peter Andrey Smith

BOOK REVIEW

- 70** **Are friends electric?**
Three books examine our complex and often fraught relationship with robots, AI, and automation.
By Bryan Gardiner

FIELD NOTES

- 76** **Animating ancient animals**
The field of paleo-inspired robotics is opening up a new way to study extinct species.
By Shi En Kim

FICTION

- 82** **My sex doll is mad at me**
By Leo Herrera
- 88** **The AI Hype Index**
Our highly subjective take on the latest buzz in artificial intelligence.
