|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|----|
| Optical properties of $\text{TiGa}(\text{S}_x\text{Se}_{1-x})_2$ layered mixed crystals ( $0 \leq x \leq 1$ ): Absorption edge and photoluminescence study at $T = 10$ K ..... | <i>Nizami Gasanly</i>                                                                                       | 30 |
| Asymptotics of activity series at the divergence point.....                                                                                                                    | <i>Svetlana Ushcats, Mykhailo Ushcats, Leonid Bulavin, Oksana Svechnikova and Ihor Mykheliev</i>            | 31 |
| Sensing of ammonia gas by undoped and aluminum-doped tin oxide nanoparticles by Raman spectroscopy .....                                                                       | <i>K Bhuyan, A Bhattacharjee and P R Alapati</i>                                                            | 32 |
| A new 5D hyperchaotic system with stable equilibrium point, transient chaotic behaviour and its fractional-order form .....                                                    | <i>Jay Prakash Singh, K Rajagopal and Binoy Krishna Roy</i>                                                 | 33 |
| Tailoring multilayer quantum wells for spin devices .....                                                                                                                      | <i>S Ullah, G M Gusev, A K Bakarov and F G G Hernandez</i>                                                  | 34 |
| Optimisation of a hybrid photoneutron source in a linear accelerator using GEANT4 and MCNPX Monte Carlo codes.....                                                             | <i>Mitra Ghergherehchi, Junho Ko, Narjes Arabyarmohammadi, Hossein Afarideh and Yoon Sang Kim</i>           | 35 |
| The envelope travelling wave solutions to the Gerdjikov–Ivanov model .....                                                                                                     | <i>Shu Yang</i>                                                                                             | 36 |
| Design and development of low-cost room temperature electric field poling system for the fabrication of quasi-phase matching devices .....                                     | <i>Toijam Sunder Meetei, Shanmugam Boomadevi and Krishnamoorthy Pandiyan</i>                                | 37 |
| Improving amplitude-modulated signals by re-scaled and twice sampling vibrational resonance methods .....                                                                      | <i>Pengxiang Jia, Jianhua Yang, Houguang Liu and Eryi Hu</i>                                                | 38 |
| Harmonic oscillator Wigner function extension to exceptional polynomials.....                                                                                                  | <i>K V S Shiv Chaitanya</i>                                                                                 | 39 |
| Influence of quadrupole–quadrupole-type interaction on the chaotic dynamics of $\alpha$ -helical proteins .....                                                                | <i>K Angelin Jeba, M M Latha and Sudhir R Jain</i>                                                          | 40 |
| Fabrication and photoresponse of n- $\text{WS}_2$ /p- $\text{V}_{0.25}\text{W}_{0.75}\text{Se}_2$ van der Waals heterojunction .....                                           | <i>Pratik Pataniya, G K Solanki, Chetan K Zankat, Mohit Tannarana, C K Sumesh, K D Patel and V M Pathak</i> | 41 |
| Genetic programming modelling for the electrical resistivity of Cu–Zn thin films .....                                                                                         | <i>İsmail Hakki Karahan and Rasim Ozdemir</i>                                                               | 42 |
