Journal of the Indian Chemical Society

VOLUME 95

NUMBER 9

SEPTEMBER 2018

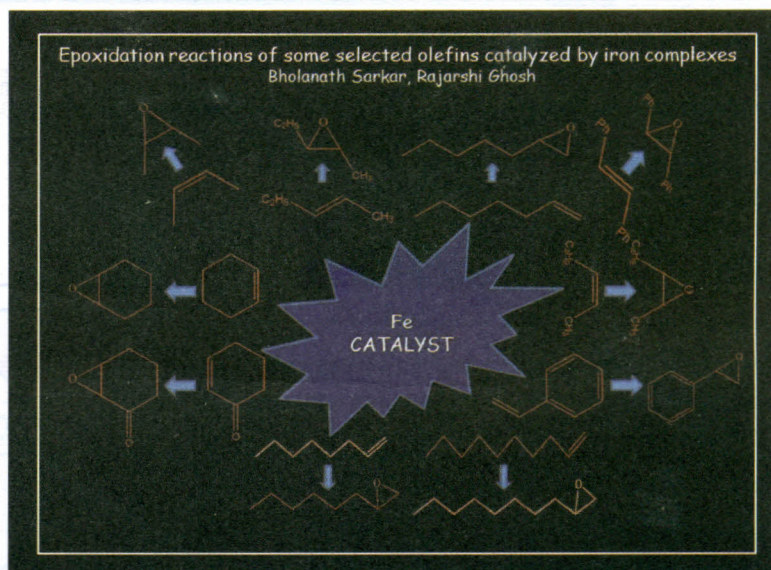

CONTENTS

Inorganic Chemistry

Epoxidation reactions of some selected olefins catalyzed by iron complexes

Bhola Nath Sarkar and Rajarshi Ghosh

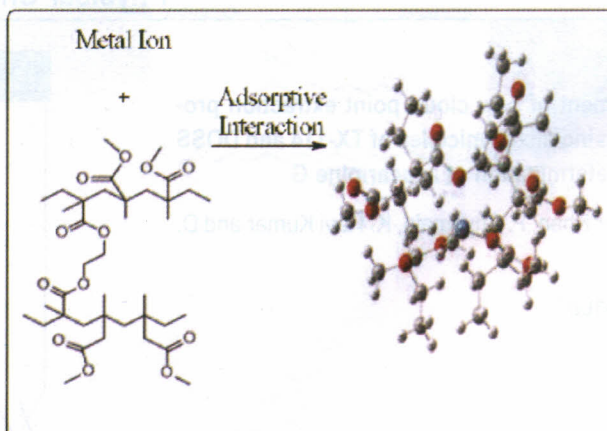

pp. 1045-1054

Studies on adsorption mechanism of Cu^{II} and Ni^{II} onto polymeric resins

Swastika Gogoi and Monali Dutta Saikia

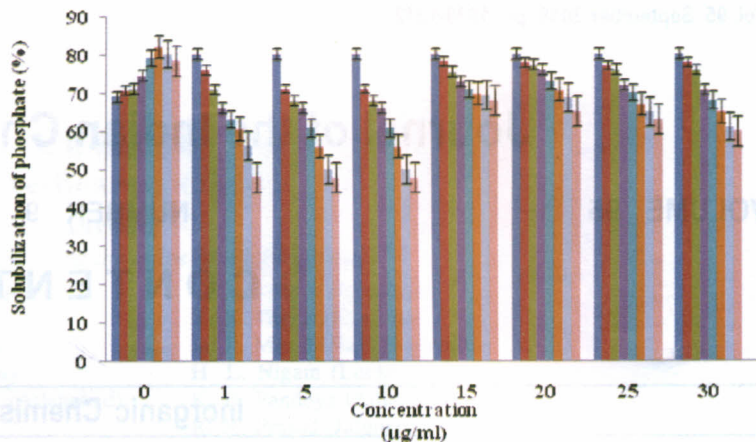

pp. 1055-1065

Characterization of the solubilization of Indian rock phosphate by *Aspergillus niger* AB100 as a function of mineral elements

Runa Ghosh, Subhadeep Ganguly and Ajit Kumar Banik

pp. 1067-1071

Kinetic and mechanistic studies on the oxidation of DL-aspartic acid with manganese(III) in sulphuric acid medium

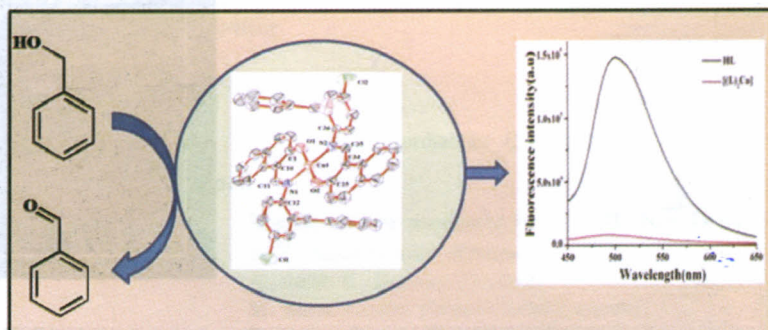

Rama Rajeswari Makena, Rallabandi Rambabu and Parvataneni Vani

pp. 1073-1078

Synthesis, structure and, photophysical and catalytic properties of a copper(II) complex containing bidentate (N,O) Schiff-base ligand

Supriya Debnath, Tapasi Das, Sankar Prasad Parua and Kajal Krishna Rajak

pp. 1079-1084

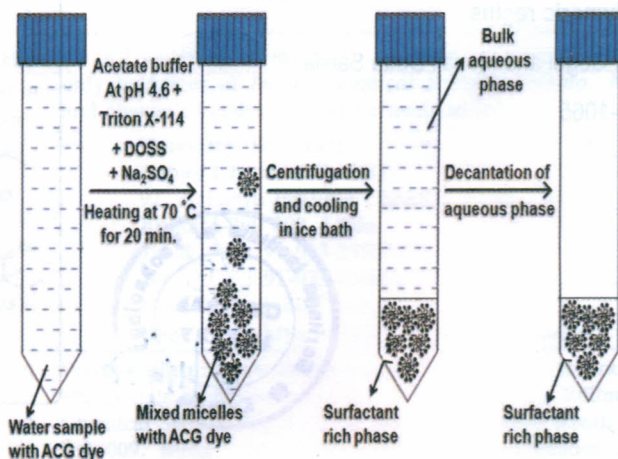

Physical Chemistry

Development of new cloud point extraction procedure using mixed micelles of TX-114 and DOSS for the determination of azocarmine G

Sk. Ameer Khan, P. Shyamala, K. Ravi Kumar and D. Suneetha

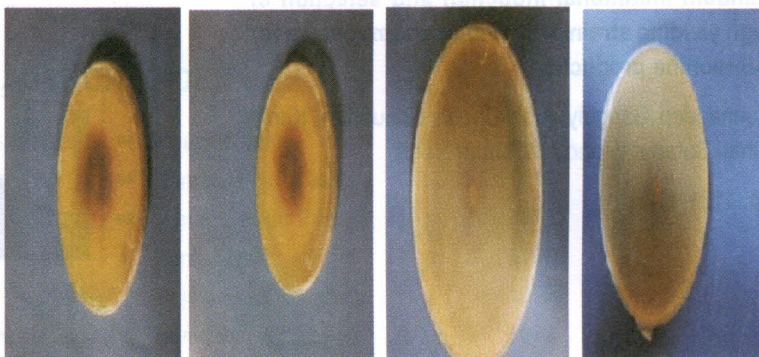

pp. 1085-1088

Synthesis and optimization of plant-based silver nanoparticles and evaluation of antimicrobial properties

Mahbob Lotfi, Mojtaba Delshad, Vahid Zarinnia, Amir Mosavi and Fereshte Nematolahi

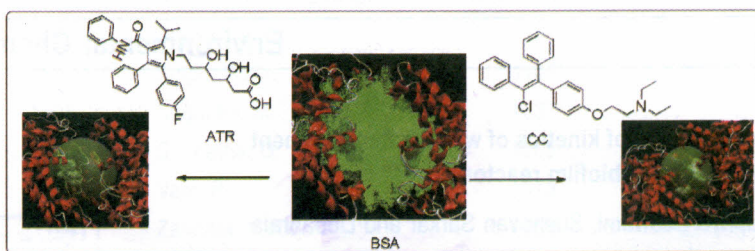

pp. 1089-1096

Spectroscopic and thermodynamic studies on the interaction of atorvastatin and clomiphene drugs with bovine serum albumin in aqueous buffer

M. Suganthi and Kuppanagounder P. Elango

pp. 1097-1106

Organic Chemistry

Isolation, characterization and biological potential of compounds from flowers of *Moringa oleifera*

Jyoti Punia and Rajvir Singh

pp. 1107-1120
