CONTENTS

Can we distinguish positive cooperativity from autocatalysis in enzyme kinetics?

Sharmistha Dhatt, Kinshuk Banerjee and Kamal Bhattacharyya

pp. 909-916

We have found that a specific type of plot can distinguish autocatalysis (Scheme 2) from either the plain MM kinetics (Scheme 1) or cooperativity (Scheme 3 or 4).

Bioconjugates from smart polymers and β -galactosidase: Synthesis, characterization and application in producing galacto-oligosaccharides from lactose

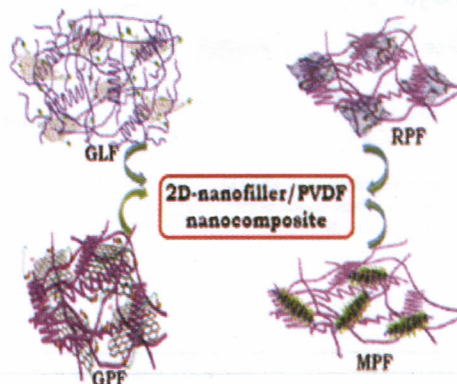

Tapas Palai and P. K. Bhattacharya

pp. 917-924

Enhancement of mechanical, electrical and dielectric properties in poly(vinylidene fluoride) composites with two dimensional nanomaterials

Nirmal Maity, Amit Mandal and Arun K. Nandi

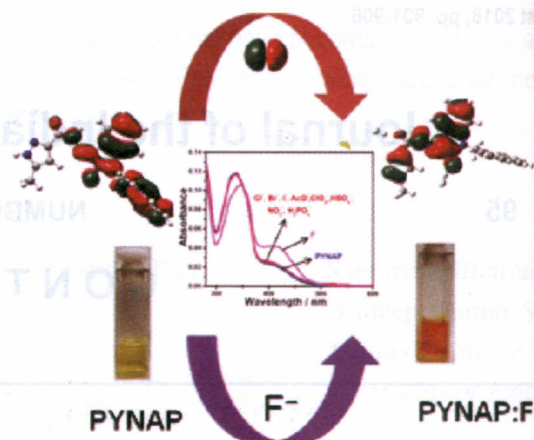

pp. 925-932

Employing a synthesized pyrazole derivative for selectively visible detection of fluoride ion and its explanation by theoretical calculations

Swadesh Ghosh, Dipti Singharoy, Anamika Dhara, Jnan Prakash Naskar and Subhash Chandra Bhattacharya

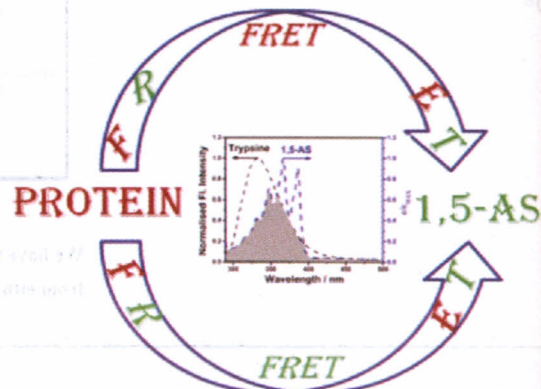

pp. 933-938

Fluorescence resonance energy transfer: A spectroscopic study

Dipti Singharoy, Swadesh Ghosh and Subhash Chandra Bhattacharya

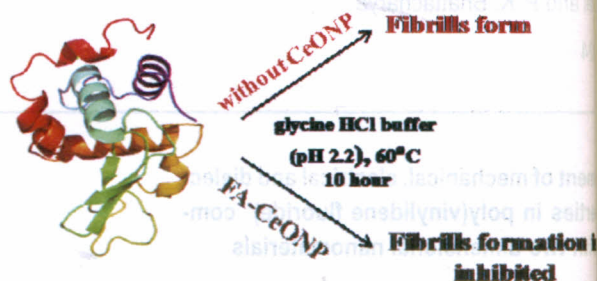

pp. 939-944

Inhibition of fibrillation of lysozyme by folic acid functionalized cerium oxide nanoparticle

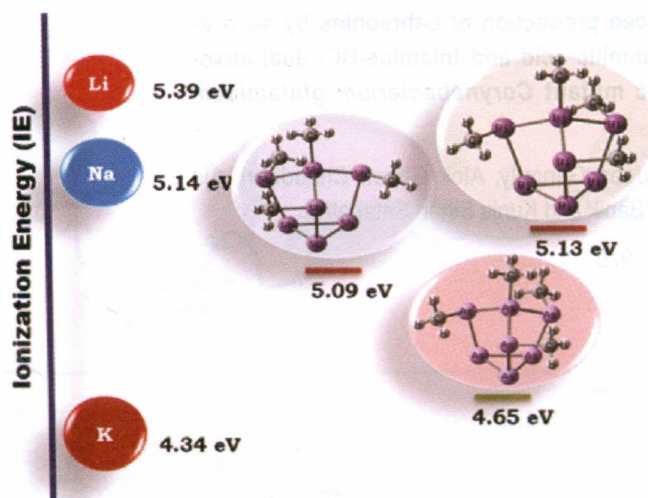

Boby Samai, Soumya Sundar Mati and Subhash Chandra Bhattacharya

pp. 945-949

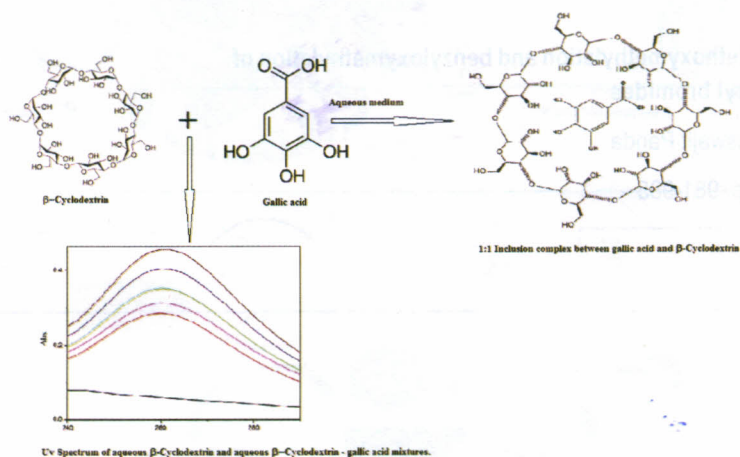

Structure, bonding and superalkali behaviour of organo-Zintl clusters X_7Me_4 ($X = As, Sb$ and Bi)

G. Naaresh Reddy, Aritra Mukhopadhyay, Rakesh Parida, Gourisankar Roymahapatra and Santanab Giri
pp. 951-959

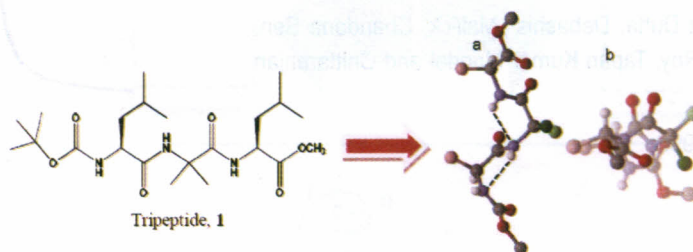

Thermophysical properties of gallic acid in aqueous β -cyclodextrin solutions at different temperatures

Abhijit Sarkar and Biswajit Sinha
pp. 961-970

α -Aminoisobutyric acid: A single amino acid chain inverter

Rajib Sarkar
pp. 971-974

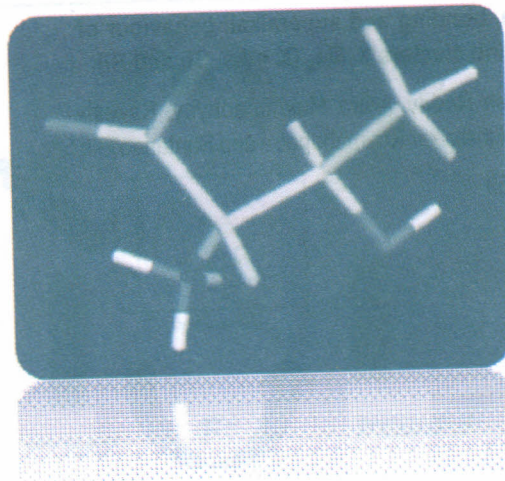

(a) The 2 $\rightarrow$ 1 hydrogen bonds of peptide 1 showing single amino acid chain inverter. (b) The top view showing the helix hollow

Enhanced production of L-threonine by an α,ϵ -diamopimilic acid and thiamine-HCl dual auxotrophic mutant *Corynebacterium glutamicum* X1870

Subhadeep Ganguly, Alok Ghosh Chaudhuri, Ajit Kumar Banik and Kunja Bihari Satapathy

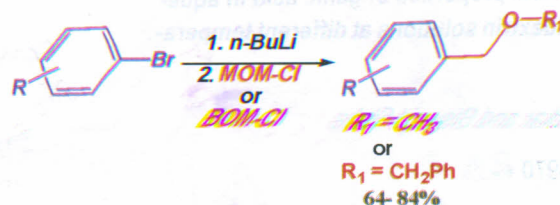

pp. 975-979

Methoxymethylation and benzyloxymethylation of aryl bromides

Biswajit Panda

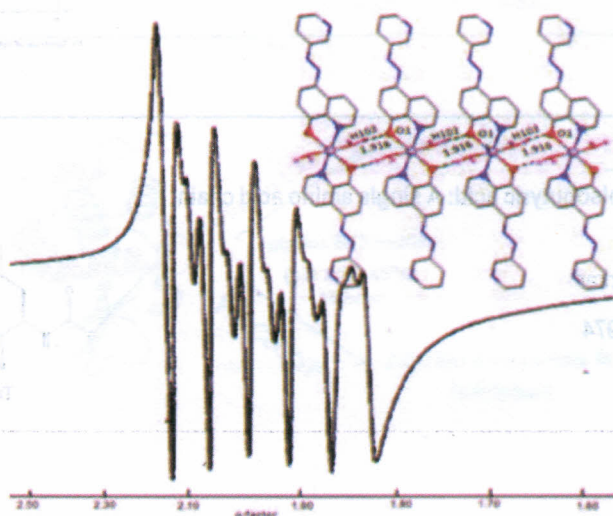

pp. 981-985

Quinolinyl-azo-pyridine coordinated complexes of some 3d block metal ions: Synthesis, spectroscopic characterization and X-ray study

Paramita Dutta, Debashis Mallick, Chandana Sen, Suman Roy, Tapan Kumar Mondal and Chittaranjan Sinha

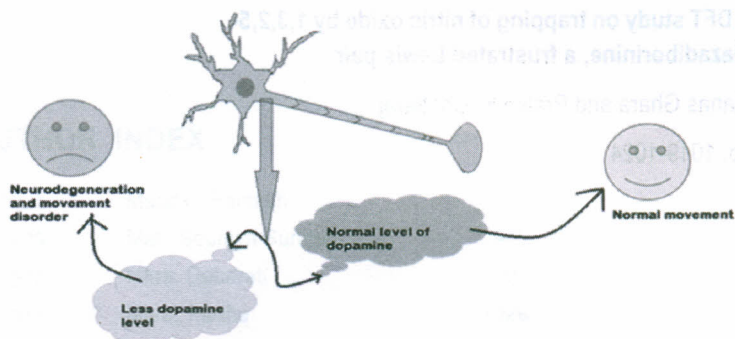

pp. 987-995

New vista in Parkinson's disease treatment: Magic of nanotechnology

Mukulika Mandal, Aishwarya Mukherjee and Suvroma Gupta

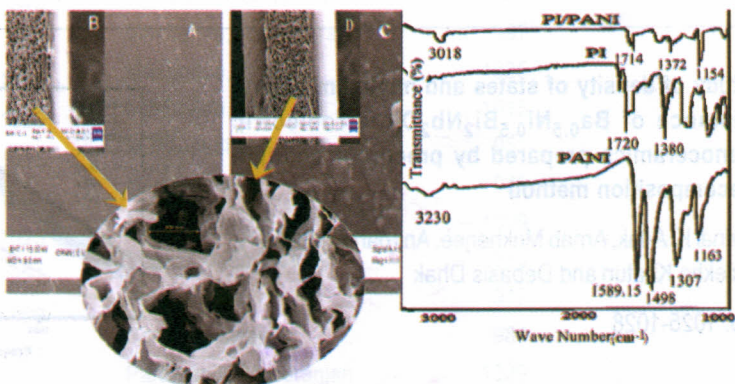

pp. 997-1002

Fabrication and characterization of pervaporative nanocomposite membrane for removal of benzene from model pyrolysis gasoline

Monalisha Samanta, Sayan Roychowdhury and Debarati Mitra

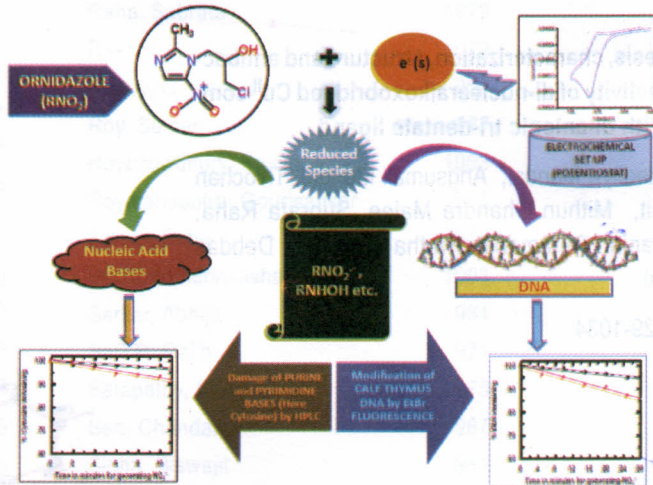

pp. 1003-1007

Interaction of electrochemically generated reduction products of Ornidazole with nucleic acid bases and calf thymus DNA

Promita Nandy and Saurabh Das

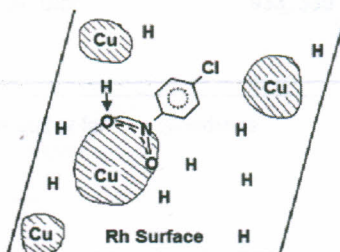

pp. 1009-1014

Promotional action of Cu in Rh-Cu/activated carbon catalyst for selective hydrogenation of *para*-chloronitrobenzene to *para*-chloroaniline

Ajit Das, Riya Mukherjee, Ramesh Mandal, Kamala M. Hansda and Nagendranath Mahata

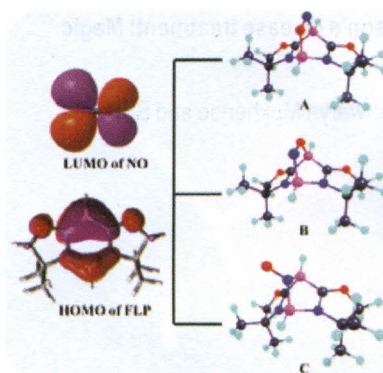

pp. 1015-1018

A DFT study on trapping of nitric oxide by 1,3,2,5-diazadiborinine, a frustrated Lewis pair

Manas Ghara and Pratim K. Chattaraj

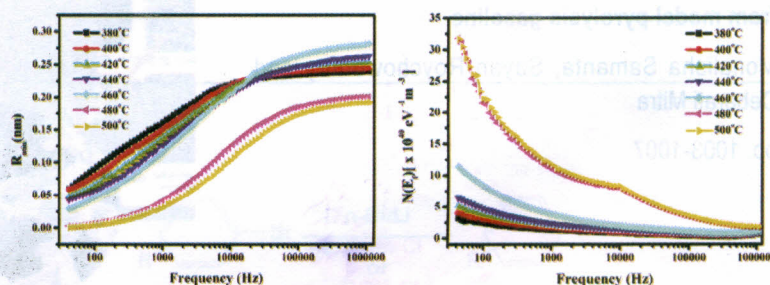

pp. 1019-1024

Study of density of states and minimum hopping distance of $\text{Ba}_{0.5}\text{Ni}_{0.5}\text{Bi}_2\text{Nb}_2\text{O}_9$ ferroelectric nanoceramics prepared by precursor solution decomposition method

Mrinal K. Adak, Arnab Mukherjee, Anirban Chowdhury, Julekha Khatun and Debasis Dhak

pp. 1025-1028

Synthesis, characterization, structure and antibacterial activity of di-nuclearalkoxobridged Cu^{II} complex with di-anionic tri-dentate ligand

Bikramaditya Mandal, Angsumali Mondal, Trilochan Rakshit, Mithun Chandra Majee, Subrata Raha, Manoranjan Paramanik, Partha Mitra and Debdas Mandal

pp. 1029-1034
