Special Issue on 'Nanoscience and Technology'

Bulletin of Materials Science

Volume 41, No. 5, October 2018

CONTENTS

Special Issue on Nanoscience and Technology

Fabrication of stretchable compliant electrodes on PDMS with Au nanoparticles Ritu Gupta	114	Suggested standards for reporting power and energy density in supercapacitor research Y Hu and T S Fisher	124
<i>In-situ</i> TiO ₂ -rGO nanocomposites for CO gas sensing Suresh Bandi, Vikram Hastak, D R Peshwe and Ajeet K Srivastav	115	2D molecular precursor for a one-pot synthesis of semiconducting metal sulphide nanocrystals Abhijit Bera and Bhagavatula L V Prasad	125
Influence of zinc oxide nanorods on an orientationally ordered fluid comprising soft-bent dimers Pragnya Satapathy, Srividhya Parthasarathi, D S Shankar Rao, Madhubabu Kanakala, C V Yelamagad and S Krishna Prasad	116	Effect of annealing-temperature-assisted phase evolution on conductivity of solution combustion processed calcium vanadium oxide films G Manjunath, Robbi Vivek Vardhan, Ashritha Salian, Rashi Jagannatha, Mayank Kedia and Saumen Mandal	126
Pseudo-Jahn-Teller effects in two-dimensional silicene, germanene and stanene: a crystal orbital vibronic coupling density analysis Maitrayee Ghosh and Ayan Datta	117	Large magnetoresistance in carbon-coated Ni/NiO nanoparticles Subir Roy, Rajesh Katoch and S Angappane	127
Metallophthalocyanine-nanofibre-based electrodes for electrochemical sensing of biomolecules K Priya Madhuri and Neena S John	118	CuBO ₂ nanonetwork: a novel and significant candidate for photocatalytic dye degradation S Santra, A Das, N S Das and K K Chattopadhyay	128
Synthesis of Chevrel phase (Cu _{1.8} Mo ₆ S ₈) in composite with molybdenum carbide for hydrogen evolution reactions Kasinath Ojha, Shivali Banerjee, Manu Sharma, Preeti Dagar and Ashok K Ganguli	119	Synthesis and properties of graphene and its 2D inorganic analogues with potential applications Uttam Gupta, K Gopalakrishnan and C N R Rao	129
Thermal conductivity studies on magnetite nanofluids coated with short-chain and long-chain fatty acid surfactants R Lenin, A Dadwal and P A Joy	120	Twisted multilayer graphene exhibiting strong absorption bands induced by van Hove Singularities Umesha Mogera and Giridhar U Kulkarni	130
Templated synthesis and characterization of red-emitting Ca _{1-x} Sr _{1-x} Eu _{2x} ³⁺ SiO ₄ phosphor for LED applications Abinaya Mayavan, Jaysiva Ganesamurthi and Sakthivel Gandhi	121	Effect of Ar ⁺ ion implantation on the properties of electrodeposited CdTe thin films Saloni Goyal and R P Chauhan	131
Perspective of dye-encapsulated conjugated polymer nanoparticles for potential applications Bikash Jana, Santanu Bhattacharyya and Amitava Patra	122	Magnetically retrievable nanocomposite of magnesium ferrite and bentonite clay for sequestration of Pb(II) and Ni(II) ions: a comparative study Manpreet Kaur, Manpreet Kaur Ubhi and Dhanwinder Singh	132
Improving range of SPR tunability and extinction efficiency of spheroidal silver nanostructures in graphene environment Shivani Bhardwaj and R P Sharma	123	A hybrid system: MnO-incorporated mesoporous silica nanoparticles for theranostic applications Varuna Kumaravel, Kartikeyan Damodaran, Sakthivel Gandhi and Uma Maheswari Krishnan	133

Effect of CTAB coating on structural, magnetic and peroxidase mimic activity of ferric oxide nanoparticles
Dikshit Garg, Manpreet Kaur, Sucheta Sharma and Vibha Verma

134

Confinement of an antiferroelectric liquid crystal in a polymer nanonetwork: thermal and dielectric behaviour

Marlin Baral, A P Ranjitha and S Krishna Prasad

135
