|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Molecular characterization of OAS1 as a biomarker molecule for early pregnancy diagnosis in <i>Bubalus bubalis</i><br>Kanisht Batra, Trilok Nanda, Aman Kumar, Rajni Kumari, Vinay Kumar & Ushila Maan                                                                                                                    | 97  |
| Garlic extract based preparation of size controlled superparamagnetic hematite nanoparticles and their cytotoxic applications<br>Kalyani Rath & Shampa Sen                                                                                                                                                                | 108 |
| Designing of siRNAs for various target genes of <i>Cucumber mosaic virus</i> subgroup IB<br>Revathy K A & Bhat A I                                                                                                                                                                                                        | 119 |
| Comparative studies on biomass of <i>Anabaena ambigua</i> grown in an external loop airlift photobioreactor using cross-shaped and circular sparger<br>M B Venkataramana Reddy & M Mukunda Vani                                                                                                                           | 126 |
| Generation of a cadmium-binding filamentous phage through cysteine-rich peptide display on PVIII<br>Román-Azcona M S, Trigüis S, Caballero S, Michajluck J & Sotelo P H                                                                                                                                                   | 132 |
| Production and partial purification of $\beta$ -galactosidase enzyme from probiotic <i>Bacillus subtilis</i> SK09<br>G Criselda Percival, M Chamundeeswari, Rachel Lovlyna F, Seethalakshmi R & G Sreekumar                                                                                                               | 139 |
| Genetic determination and characterization of extended spectrum $\beta$ -lactamase producing <i>Escherichia coli</i> and <i>Klebsiella pneumoniae</i> in a tertiary care hospital, India<br>Nagarajan Padmini, Antony Alex Kennedy Ajilda, Natesan Sivakumar, Indrajith Sureka, Ramasamy Senthil Kumar & Gopal Selvakumar | 145 |
| Microsatellite (SSR) markers assisted characterization of rice ( <i>Oryza sativa</i> L.) genotypes in relation to salt tolerance<br>Bibha Rani & V K Sharma                                                                                                                                                               | 151 |
| Genetic polymorphism in <i>Dalbergia sissoo</i> Roxb. using RAPD markers<br>Shivani Dobhal, Shruti Sharma, Nafeesh Ahmed & Ashok Kumar                                                                                                                                                                                    | 164 |
| A novel and discernible plate assay method for the qualitative screening of bacterial keratinases<br>Ruchi Sharma & Sunita Devi                                                                                                                                                                                           | 174 |
| <b>Instructions to Contributors</b>                                                                                                                                                                                                                                                                                       | 181 |
